

Michio Kaku on Aliens Brains

The subtitles

I love to watch science fiction movies, but I cringe- I cringe whenever I see a depiction of the Aliens.

First of all the aliens speak perfect english. Not just british english , they speak perfect american english.

And obviously they are human inside come a kind of monkey suit.

I mean we have hollywood special effects, right? So why can't we get better aliens? And then the aliens think just like us, They're territorial. They want to conquer. They want resources. They want - they see humans as inferior.

But You, see? that's only a byproduct of our evolution. Look at other animals in the animal kingdom. Some animals are not territorial, okay? They do not have to conquer. We have other paradigms in the animal kingdom which are totally different from the way our brain is constructed.

But when we look at aliens in the movies, we're basically projecting our own consciousness in aliens. Our fears, our desires are projected and they are a mirror of who we are, not a mirror of who they really are.

For example, if we take a look at a bat or a dog, the dog's brain is mainly interested in smells. It's swirling in a universe of smells, while a bat's brain mainly is concentrated on sonar, on detecting clicks and echoes. Same thing with the dolphin brain. Their consciousness is totally different from our consciousness because they see things differently than us because of their evolutionary history.

For example, when we see a cat and the cat comes up to us and tries to purr next to us, we say to ourselves, "oh, nice cat, The cat is being affectionate". No. The cat is not being affectionate. It's simply rubbing his hormones on you and saying, "I own this human. This human is mine. I am marking my territory. This human feeds me twice a day. I have trained him". So, a cat sees the universe totally different than we do and yet we impose our thinking on an alien.

Now on the question of intelligence. If these aliens are more intelligent than us, how would they be more intelligent? In the book I say that one of the main ingredients of intelligence is to predict the future. The ability to simulate today so we see tomorrow. And that requires a high level of intelligence to be able to understand the laws of nature, the laws of people. what is the most likely outcome of a future event. That requires intelligence. If they are more intelligent than us. They will see the future much better than us. They will see outcomes that we cannot foresee. They will simulate scenarios that we cannot even dream

of. They can outwit us every time.

Think of a safecracker. A safecracker may have a low IQ, may have dropped out of elementary school. But the safecracker can simulate the future much better than a cop can and that's why he can rob banks and get away with it. And so, in other words, the criminal mind is not necessarily stupid because it has low IQ. It's quite well adapted for what it does. And what it does is to simulate the future of a crime.

Now think about when we encounter intelligent life that's more intelligent than us. They may see the world totally differently. Their world may be a world of smells, a world of sounds rather than a world of eyesight like our brain is constructed. And most important, they may be able to see the outcome of future events much better than us. They will be able to actually run circles around us because they see the future.

Michio kaku on Aliens Brains

Comments by Dimitrios Mantzanas:

In this video Michio Kaku make his analysis and explain his opinion about the extraterrestrial life forms, and in my opinion , begins correctly by saying that his opinion is that the extraterrestrials will not be actors "heroes" from hollywood movies, but that they will have a more composite and polysynthetic thinking and manners of understanding from the humans, and he refers to different forms of thinking and understanding that different of our mother Nature's species have in order to understand the world from their own scope, in some point he refers and that's needed a high level of intelligence in order to be able to understand the laws of nature, that his opinion is that they the extraterrestrials can to outwit us every time, they would want (or every time they even want?), that we will forced to encounter forms of life (creatures, biological extraterrestrial creatures) come from extraterrestrial more intelligence from us (the Earthy's) environments, with more from us the humans, years of evolutionary path and more advanced gene chains, (older in ages from our Mother Nature's gene chain) extraterrestrial gene chains, with probably to have the abilities to percept the space and time with manners similar with the manners used of other of our Mother Nature's creatures.

Report by Dimitris Mantzanas

About: Michio Kaku on Aliens Brains

My Report about: Michio Kaku on Aliens Brains

And my own opinion is that the extraterrestrials will not have (or they not have-the until now collected data gives many possibilities extraterrestrial life forms to already visiting the Earth and from decades ago) no one relation with what the hollywood movies present about them. Sure, they will be the most advanced creatures of their own extraterrestrials Mother Nature's extraterrestrial gene chains.

Regarding the extraterrestrial life forms who (the data gives the picture that already) are visiting the Earth. And only the fact that they make long distance space voyages (first of all means that they have more advanced technology than the Earthy technology) gives to them and pictures and knowledge and beyond of their own home planet environments (many pictures and knowledge about very different conditions and environments and environmental conditions and living creatures and from other beyond their home planet, planets and regarding the visiting's on Earth and from the Earthy life, but all these planets as many and to be, all have created in this universe and created and governing by the same natural cosmic powers as and our planet Earth and anyone of the extraterrestrial forms of life on these planets whichever morph and level of advanced evolution creation and to have the certain is that created and governing by the same natural cosmic laws with us the Earthy's), and their chances they too have developed a composite and polysynthetic thinking and manners of understanding and advanced intelligence, but are they have developed brain advantage against us? "Extraterrestrial mighty brain"? (As our own Earthy Mother Nature have created the Earthy "who" to counter-array them? to counter-array the extraterrestrials?), but from the scop that the correct military tactic we cannot, it is not correct we underestimate them, so we suppose that they will be difficult opponents.

And Michio Kaku refers as example the different forms of thinking and understanding that different of our Mother Nature's species of creatures have in order to understand their environments (their world), I was created by Mother Nature with the capability to communicate except the humans (verbal and through brain to brain interface), and (through brain to brain interface) with all of the other of her species of creatures of Earthy life, and from my creation I have in my brain are protected (so strong that nothing can loss of its knowledge) and all

the instincts defensive and offensive of all the rests Mother Nature's species of creatures, and me with and the capability and to percept and to understand their different manners of thinking and understanding with which they understand their around world (their environments) and their living conditions. So I have from my creation a more composite and polysynthetic thinking and manners of understanding from the rest humans, and my perception my mighty energy perception do not limit to close distant to me environment but cover all the planet earth and all the different environments and environmental entities, so I was created and with the capability to understand the laws of nature, something that Michio Kaku according with his opinion say that it's needed a high level of intelligence in order someone to be able to understand, and culturally, my cultural society contains all the human cultural but and the of natural's species of creatures societies and their primitive cultures, that is, a very strong background. So I do not think that the extraterrestrials could ever to outwit me (and either my own genus - my own tribe) neither intellectually, nor mentally, nor culturally, nor to perceptiveness, in no one case, the fact that my mighty energy perception covers all the Earth gives me the intelligence which come from all the earthly environments, entities, and societies, and from my creation the Mother Nature's powerful gene chain gave me (and as me the progenitor and to all of my own genus - my own tribe) the capability to possess, to use and handle the fundamental physical laws and all the resulting laws of physics, and the knowledge to do that with the properly manners and for the right purposes and this capability reach and to level me and to percept and to understand the structures of the space and time (the universe on its base consists of space - time infrastructure) and the capability to interfere to this structures and being defying the laws of physics to distorted the space and time. So, we Earthy's in general have not to fear nothing from our contact with any extraterrestrial life form from whichever advanced extraterrestrial gene chain and to come from this life form, our Mother Nature's gene chain gave us to Earthy's the advantage for us in any contact and to occur to us in the universe.

[I was created by Mother Nature and to possess the natural cosmic mighty powers "mighty and human, biological creature" who cover no all the universe but only the planet Earth and extend and in some distant beyond the Earthy boundaries, and gave me and the capability so obviously and the right to be able to communicate not only with the humans (verbal and in brain to brain interface), but with and all other of her living species of creatures (natural creatures - animals) through brain to brain interface and integration (from one place stand me) simultaneously with her billions of creatures in all over the entire planet, and without me to make them known my existence to read their thoughts and their memories of all with brain of Mother Nature's creatures (brain to brain interface

and interaction in general and as much this regard the natural creatures) me to be able to without to annoy them to learn from them through their perception and the happenings in their in many cases unapproachable for humans their living environments (but and what difficulties in their living conditions as fir example of the pollution or and from lack of food that maybe to be face or about the climatic conditions of their environments) and with the capability to understanding their nature of each one of all these species and the different character of each one of them (as we know and from the domestic animals as the dogs and cats, and these species have differences in their characters between individuals of each species), me to have great capability of analyzing with great speed of thinking data of the entire planet Earth, with capability that in really enormous capability of memory storage in my brain, with capability of understanding the different intelligences of each one of the millions of Mother Nature's species of creatures (natural creatures – animals) of all their categories (on land, in the seas, and into the air), and their living conditions and needs, so without to annoy them I can to one way with productive thought interface and interaction, and me with the capability to have and my own mighty human energy perception who give me access and envision in every environment and in every point of the planet Earth until and from the space around the planet Earth, and to act on behalf the interests of the whole Mother Nature and entire the planet Earth. And as I was created with the capability to perceive the total of Mother Nature's total perception and the total perception of the entire planet Earth and this perception to extend as extend and beyond the Earthy boundaries I was created and with capability to understand the laws of nature and the wonderful Mother Nature's total existence and the entire wonderful planet Earth, and the wonderful place in which (the universe) finding the planet Earth, and this whole is a really wonderful world, and even further from this I was created by Mother Nature to possess the natural cosmic "mighty human powers" with which in the range of being ranged my own mighty human energy to can perceive and understanding the basic space-time infrastructure who consists the universe, and the wonderful and completed creation (in the range of my own natural cosmic "mighty human powers") of the space-time infrastructure, and all the fundamental physical laws and the resulting laws of physics and the laws of infrastructure engineering, and with the capability managing the fundamental physical laws to defying the laws of physics and in understanding the laws of infrastructure engineering to can to distort the space-time infrastructure [and after the "liberation day" and in auspice of UN, I will have the chances to discussing with Academic Societies of enough sectors and of course and first with the Society of physicists, so and me to be informed and me to inform them for this total great sector] and where and when I jugged to interfere even and in the basic space-time infrastructure in such extend that to can even and to

distort the space-time infrastructure on behalf the interests of the mother nature and of the entire planet Earth itself.

So, I am sure and that no one extraterrestrial form of life can enter with any way into my own mighty human powers range without to be made perceived from me, and I am sure that I can to recognize any extraterrestrial form of life and without me running any risk they to outwit me with their own in any level of evolution advanced brains (I was created to can read their memories and their thoughts and so and to understand their intentions and analyzing the data of their memories and thoughts to predict clearly and their real purposes, and their immediate and their ultimate distant goals) me in brain to brain interfacing and interacting with them to can communicate with them with any extraterrestrial form of life and extraterrestrial "who", and who could never to outwit me in no one case and with no one way, and simultaneously me to be informing the UN competent committee for the ongoings and I will make ad many children and my duties will be more easy.

[to add the my own capability to deactivate the every extraterrestrial weapons system and that equal mighty powers extraterrestrial "who" to could deactivate the Earthy weaponry systems and the need for body-to-body combat with extraterrestrial "who" that describe in the last paragraph] [Is this brain my brain (as me myself I have characterized in the past my brain explaining that this characterization without to mean that I am paranoid, but always in my try to be manage to warn that my brain is not toy for problematic children as were and are the nazi echelon machines basements and that would be very dangerous for them and for anyone other to consider my brain as toy) an unreal shaico? The answer is that for me no, I was created with the capability to be able to manage all this. Could ever the anyone simple human to manage all this? The answer is no never-no-one simple human could never manage all this. Is this brain uncontrolled? The answer is no in no one case no, I was created with the mean of the basic right in my brain and always I have deep belief to God and to Jesus, and I will have the chance after liberation day (at least I will pursue to have the chance) to have discussions (and I have no reservation they too can see into my brain, my mind, my thoughts) with spiritual people for any existential, cosmic, and nature, related issues].

the "who" {my own but and always Earthy "who" that have Earthy origin and provenance from the Earthy's Mother Nature's entire gene chain, from all the planet Earth and from all the species of Mother Nature's creatures, and have and powers and forces who origin and provenance from the Big Bang (if we suppose

that the universe began to created according with the Big Bang Theory that do not dispute, me at least do not dispute, the creation of the universe by the God) and from the most powerful space bodies (the "horizons of factors"), so my own but always and Earthy "who" created by Mother Nature and to possess, me to possess (and as me the first "mighty human" and progenitor through me and all of my biological descendants my own genus "mighty humans") and natural cosmic "mighty powers", so is of the planet's defensive and protective "who" for the entire planet Earth, is always indivisible and always inseparable from the Earth, and always intended from his creation to extend in thousands of units of "mighty humans", "who" are the greatest beasts of all the mother Nature's beasts ever, the Earth's forces to expand the Earthy life (in general the Earthy life) to universe, the enormous but always lawful and Earthy "who", so no reasons the Earthy's at least the legal ones from the Earthy's to fear nothing (they will not be under surveillance ad they will not have to hide nothing from themselves) from this really enormous Earthy "who", that in further analysis is inseparable part of the really enormous and prosperous for the entire planet Earth, future for the lawful Earth's in genera

[Mother Nature from my creation in June 1974 gave me and the capability (so and the lawful and inalienable rights) to make children (and in the normal for humans age my genital organs had started to produce genital matter), so from my creation gave me and the capability as me to be able to be individually constantly and always in productive interface and interactivity with all the Mother Nature and the entire planet Earth, so gave me and the capability to be able to be and together with many of my own biological descendants, that is, with many of my own genus, and individually and collectively in productive always interface and interactivity with all the Mother Nature and the entire planet Earth, and as to me, so gave the capability and to all of my biological descendants we individually but and collectively to act with many (and thousands) units of my own genus-my own tribe "mighty humans" (units of "who") composing an extended enormous but always Earthy, with plenty of natural cosmic powers collectively "who" being constituted the Earth's defensive and protective collectively force (an invincible planet Earth), who no one of the legal ones have nothing to fear (will not be under surveillance so and have nothing from themselves to hide and from no one), and that can be expand the Earthy life (in general the Earthy life-the Earthy Mother Nature) and in other uninhabited planets in other solar systems in the so called habitation zone, and which planets we, the Earthy "who" having (as we have) the natural cosmic mighty powers that Mother Nature gave as, we and can gradually to shape their physical constants for habitation of Earthy life].

[Extraterrestrial, equal in mighty powers with me, the created by entire Earthy's Mother Nature's gene chain Earthy "who", created by entire Extraterrestrial Mother Nature's gene chains Extraterrestrial "who" that could some time (one of the pending from the universe and asymmetric threats) to launch an attack against the Earth and in dependence of the numbers from their attacking units, an unitary attack, or an of some units being consisted attacking squadron, or of an enormous and expansionist combined and supported of many units (maybe hundreds or and thousands) of extraterrestrial "who" wide attack, and that extraterrestrial "who" they may have in their possession natural cosmic mighty powers and then depend of how much mighty would be their natural cosmic powers to have the capability (and could probably to have the capability) to interfere in to universe's space-time infrastructure and they to deactivate the whichever mechanical and electronic Earthy weapons and weaponry systems, and then arrive the time for the primitive forces to protect in body-to-body combat the right to life, to existence, to reproduction, and the Earthy "who" with all their Earthy provenance mighty human somatic endurances and strengths and their great adaptability in different environmental and climate conditions (I can to control, to increase and decrease my somatic temperature, and to increase my muscle mass and to reinforce in great extent my somatic endurance and strength as I can have and great flexibility) will have to counter-array in body-to-body combat against the extraterrestrial "who", and the Earthy "who" will have to based for this fight to their provenance and from all the Mother Nature's physical creatures (animals) beasts-the Mother Nature's physical creatures (animals) "who", on their instincts and on their endurances and strengths, on their beast souls and on their fighting spirit, as from his creation the entire Earthy's mother Nature's gene chain "who" is and the greatest beast of all the Mother Nature's beasts ever, and as when the Mother Nature's beasts need to fight they fighting with all their straight always body (as for example the Jaguar the natural creature "who" of the Amazon Rainforests, they (the Jaguar), in their habitat living in the jungles of Amazon Rainforests, they every day fight for their livings, of course they are predators the ultimate predators of this difficult to living environment, and of course they are natural killers with killer instincts properly for their difficult living conditions in the dense jungle which requires increased perception of the surround space where they move and hunt for their livings and where they are forced to combat body-to-body every day with different of them creatures (as are the anaconda, the alligators, and other creatures), so they must have perception of the different organisms natural creatures (and with different instincts and intelligence) of them, their preys, and they are of the most effective predators (killer with ultimate killer instincts) in the world of the natural creatures, who almost every time and after having approached with concealment (great adaptability in their environment) their

preys, they kill with one bite. And as they are forced to combat with different of them creatures they have develop and perception about their different of them preys. So, in a possible need the Earthy "who" to involve in combat body-to-body with extraterrestrial forms of life, "who" of course will be different from the humans, but biological creatures with differences and in the morph, and in their instincts, and in their intelligence, and in their somatic abilities, in such case the contribution of the Amazon's Rainforests natural creatures "who" in the creation of the Earthy "who" is lessons from the same the Mother Nature, from the beginning of his creation yet, to the Earthy "who", and as the Amazon's Rainforests "who" and the contribution and from other natural creatures "who" in the beast soul and fighting spirit, abilities and instincts) and his capability (through his "mighty human energy perception" who cover the whole Earth and extend and beyond the Earth's boundaries) to be continuously in brain to brain interface and interaction with these natural creatures "who" and with all his Mother Nature's creation provenance means that is inseparable from the planet Earth, and if it needs for the protection of the home Earthy planet, the Earthy's "who" as many units and to be will fight until and the last unit to fall (to be killed) in the battle, no one step back never, we cannot live, we cannot exist, we cannot reproduce, without our home planet Earth, we cannot go to other planets without to have ensure the defense and protection, and the existence of our Earthy provenance, that is for me and for my own genus "mighty humans", as and the greatest beast of all the mother nature's beasts the mighty humans when need to fight, fighting with all their straight always body (and all we have seen in documentaries how the beasts fighting – videos of the Himalayan natural creatures "who"), for the mighty humans with arms and legs punches and kicks, strikes with the head, bites in the neck, with pushes, with the body weight, with the soul and the spirit of the Mother Nature's beasts until victory or death, so one of the conclusions is and that must to exist many mighty humans on Earth they are normal humans have the regular for the humans living needs, no more from the rest normal humans need for food and water, they can to working in normal and always honest and legal jobs for the livings, they can in their free from work time to be useful with honest and legal manners for the societies in which they live]

The illegal, nazi, criminal, insane, murderous, nazi criminally paranoid fantasy, harmful parasitic echelon machines basements that are all the fourth nazi, illegal, criminal, murderous, parasitic (echelon this time) reich formation, that is, the usa and the rest of ukusa agreement and the greek people, are and the only which are manufactured in their underground echelon machines and they are manufactured in such extent in their underground echelon machines that they cannot neither even to exist without their illegal, criminal, nazi criminal ways

parasitizing from me, and extremely dangerous for all the planet Earth their echelon machines, [And in order they to do not lose their existential (their nazi existential), the their nazi, illegal, nazi criminal technical midsts with which they nazi criminal ways parasitizing from me, their technical existential for them criminal and murderous echelon machines, but they and in their desire to complete what and their predecessor the third nazi (Germanic then) reich formation had done (the holocaust, they then against the Jews) an recognized as nazi holocaust genocide, all of them with their minor children together hidden behind their illegal, nazi, nazi criminal ways parasitizing from me, echelon machines and hidden all of them with these (their echelon machines) and in their illegal, nazi, nazi criminally insane, murderous, harmful parasitic echelon machines basements, they continuously perpetrating (as always they) nazi crimes against me in order they to stay hidden from me, in their echelon machines basements and they under cover (and in concealment), without my own knowledge and secretly from me, all of them together managed and stole from me, mine sperm and mine bone marrow, and without my knowledge and secretly from me, they artificial fertilized with the my own sperm "who" they stole from me (and "who" was not theirs, and is never theirs, and "who" they illegal maintain in their nazi occupation), some of their own nazi biological murderous midsts, against of my own infants (my own babies) and before my own babies born (unborn in their gestation stage of their lives) they in order to make their (their own always) nazi murderous origin and style eugenic programs and on behalf for their own children, and in order they and to do not lose their nazi existential for all of them (and for their own minor children) their nazi criminal technical ways with which they parasitizing from me, their echelon machines, all of them together (without my knowledge and secretly from me), ad they , all of them, being conspiring together with their minor children (as they always do), against me and against my own genus, and all of them and their minor children (as they themselves have confessed) as they have said, were pumping from their computers instincts of Mother Nature's beasts (natural creatures - animals "who"), that before as they have said (obviously falsely have said) had stolen from me (and illegal they maintained under their nazi occupation), all of them and their minor children wear and the suits of wild lions (a natural creatures "who"), and as always all of them together and with their illegal, criminal, nazi criminal ways parasitizing from me, their echelon machines, they attacked with wild lion's anger against the my own unborn (in their gestation stage of their lives) babies and all of them together managed to murder them]] Obviously the nazi numbers of all the ranks of all the fourth nazi, illegal, criminal, murderous, parasitic (echelon this time) reich formation have not at all, neither even to the least own natural cosmic powers, and to the opposite they hate and fear the natural cosmic powers (they must be

unnatural), and obviously their physical powers are very limited, so limited that they hate and fear the physical powers of other humans (and not only humans, but and of physical creatures) and they tries hidden in their (and from their) illegal, nazi criminally insane, murderous, harmful parasitic echelon basements to limit and the endurances and strengths of other humans, as they tries to limit and the dicks of other humans, obviously they themselves have weakly and small penises, and of course they have not balls at all, they are born without balls, they hate and fear the babies of other humans who from their creation was intended to born (as and their biological Father) with their own balls, origin from their biological Father's balls (and after they have stole sperm from the balls of their biological Father, they murder them unborn (in their gestation stage of their lives) because they cannot to appropriate their balls, as they could not never and they never can to appropriate neither the balls of their biological Father, their progenitor of their always own genus and of course I refer to the murders of my own babies that they by their own premeditation (unborn) murdered perpetrated homicides and genocide against me and against my own genus and against the Mother Nature herself), and they as they themselves confessed have perpetrated these unholy and hideous crimes on behalf the nazi murderous interests of their own children (obviously they know that they themselves are born without balls and remain themselves until their death without balls (what they want and live?) and after they tries to hide and behind their minor children who their children are born without balls nazi and illegals, as they themselves are born without balls nazi and illegals, and all of them together tries to continue to hide behind their echelon machines and with these their echelon machines and in their nazi basements and from there to continue illegally, nazi criminal technical ways (all of them live with technical support) with their echelon machines to parasitizing from me, and they perpetrating and more nazi crimes against me and against my own genus my own tribe (as they have many times confessed they plan to perpetrate and more murders of my own babies, homicides and continuing genocide against me and against my own genus) on behalf of the nazi murderous interests of their own and of their children, because they do not want to face the punishment for the crimes that they themselves and they and on behalf of their own children have perpetrated (their own children moral (immoral) perpetrators in their crimes and as all of them perpetrators and synergy in perpetration of nazi crimes (their own children moral (immoral) perpetrators) and onwards adult physical perpetrators of nazi criminally murderous crimes and continuers of their nazi criminal murderers parents nazi wretchedness of their nazi their fourth nazi parasitic formation existence who they after some years will falsely crying as their parents for their own nazi garbage children (which will be as and themselves are born moral (immoral) perpetrators of their own and their grandparents nazi criminal

murderous crimes) and will try as they parents to hide behind their minor age, and behind their echelon machines and in their nazi echelon machines basements and to continue to parasitizing from me and from my own genus the Earthy "who". They want with their false cry for their own children (and continuing to say and they themselves and their children lies and slanders and false accusations against me and against my own genus) to drag along with them all the humanity the UN in their own nazi wretchedness existence, against me and against my own genus, a my own genus "who" that created by Mother Nature for the protection and progress of all the Mother Nature and of the entire planet Earth. I did not gave them no one right to no one of them neither even to pretend that they could ever or that they can to represent me or anyone else of my own genus-my own tribe, I was never and I am never in no one basement and in no one echelon machine, and they the only that they could and they can to do is and what they doing perpetrate crimes, lying, slander, false accuse against me and against my own genus-my own tribe, and all of them from their illegal, nazi, criminal, murderous, harmful parasitic echelon machines basements, never could and they never can neither secretly nor in open view (through internet view) perpetrating crimes to represent no one future and no one civilization of no one in general, and what future and civilization they could represent perpetrating unholy and hideous nazi and nazi murderous and genocidal crimes? What future they, all of them could or can to represent hidden from their illegal, nazi criminally insane, murderous, harmful parasitic echelon machines basements? The answer none, they have not and they had no one future ever. They had and they want to continue, nazi criminal ways parasitizing, and perpetrating and even more nazi crimes and murders, to have for some more time their accidental opportunistic chance to have some more illegal, nazi, criminal, murderous, parasitic gains, are these gains? The answer no and for no one no. The "liberation day" must come, and must come soon, the real progress and prosperous future cannot wait.
