

Professor Michio Kaku & Ross Coulthart Interview

Professor Michio Kaku & Ross Coulthard interview

In this video Michio Kaku referees that about those u.s navy sightings (unidentified flying objects) from firstly 2004 and more recently right through to the present, that after pressure of the usa congress the military forces of u.s. sitting hours to hours of videotapes of something that is up there in the sky and that many of military persons who have seen these things were told them not to make waves on it. And he mentions and in this video that there was something up there and that he was not drunk (that really something there are, up there), and that for the usa's now the burden of proof is on the military to prove that these objects are not extraterrestrial (to note: that I am not never in no one of their nazi echelon basements and in no one of their nazi, criminal echelon machines, and me never was neither, in no one of their nazi echelon basements nor in no one of their nazi, criminal echelon machines) he refers that they the physicists (and I do not know who others he means) will follow the data and the data indicates that something is out there, that can be tracked by radar, infrared centers, tracked optically (so sure something there are) that can travel between Mach 5 and up to Mach 20, and now they think about that can in for a moment to accelerate up to Mach 20, he refers that they have sightings that can be triangulated that they (the unidentified flying objects) can drop 70.000 - 80.000 ft within just a matter of a few seconds they can zigzag, and that they the physicists now have calculated the G-forces inside these whatever they are (obviously must be extraterrestrial flying machines) G forces are in the hundreds of times of the force of gravity that it would turn any human into soup, in other words it would crush the bones of any organism that we are familiar with (and the extraterrestrials are biological creatures with limits by their biological creation, so must have some technology which protect them from the very high G-forces), and arises and the question, so these objects are probably drones? first they cannot be earthy aircrafts because they can exceed the capabilities of our earthy technology aircraft and put pressures on the pilots that would crush their bones – about unmanned drones? Countries as Russia and China have programs for building hypersonic drones, but that cannot have similar with the sightings capabilities and the sightings go back decades when no country had programs about building unmanned flight machines. – Related with speed exceed the speed of light (there is not speed more quick from the speed of light from there and beyond of there exists the travels in space and time) he refers that one possibility is to create a warp bubble, a warp bubble in which someone can then

hop over compressed space, requires fabulous amounts of positive and negative energy, the latest calculation that, he (Michio Kaku) have seen says that someone have to have energy comparable to the mass of Jupiter, not a star but just Jupiter in order to drive these things [enough "mighty humans" collectively act could have energy comparable, or and larger, to the mass of Jupiter, and to add that if it be needed I can (and as me and all of my own genus – my own tribe can) to cause supergravity and antigravity]

And to add that the powers which the Mother Nature copied from the horizons of factors (the most powerful interstellar bodies) and adopted to human variation "mighty humans" are the most powerful forces in the universe, and me and me as the first of my own genus and the progenitor of my own genus – my own tribe all the "mighty humans" have the ability to defy the physical laws and to distort space and time (as have this capability and the horizons of factors), something that and according the Einstein's theory of general relativity (in which and the Michio Kaku make reference) is the definition of the capability for travels in space and time (and enough mighty humans act collectively will have more chances to managed travels to space and time and to open the road for all the other Earthy's to have the possibility (and not accidental nor criminally, but jointly designed possibility) to drive on these paths. We the Earthy's will expand to the universe, is my own dream and of my own genus – my own tribe's dream, we the Earthy's in general (and the species of natural creatures) to expand into the universe, and sure I am Earthy and as many other else will want and will can to come [perhaps the our Mother Nature's gene chain not to be the older in age comparatively with other extraterrestrial gene chains, but sure is very powerful, and created something (the mighty human) that gave us the Earthy's in general the ability to can face from position of power whichever extraterrestrial, obviously biological creatures will meet, we not have to fear nothing from the extraterrestrials, and soon after the "liberation day" the UN will have and the ability to recognize and the unidentified flight objects which visits the Earth and to recognize and to communicate and with whatever creatures, obviously extraterrestrials there are in these objects, from which communication we the Earthy's have only to gain, in knowledge, in advanced technology, and we not have to fear nothing nor culturally, we come from prehistoric and ancient civilizations, we have a strong background that will be useful to us.

Professor Michio Kaku & Ross Coulthart Interview

The subtitles in text accompanied with my own comments

Introduction: Michio Kaku professor at New York University but one of the fathers of the theoretical physics concept called String Theory Mind-blowing stuff he acknowledges the reality of the phenomenon in a way that very few scientists are prepared to do publicly,

1st Question: Professor Kaku the debunkers, the sceptics they say there is no evidence of anomalous phenomena, that really the gimbal the goast the Tic-Tac videos they do not prove anything, what do you say to that?

[My own comments on the (1st Question): Professor Kaku the debunkers, the sceptics they say there is no evidence of anomalous phenomena [My own note: the warping of space-time infrastructure by the moment that being caused under control from "who" have the capability to do that it is not an anomaly or an uncontrollable dangerous anomalous phenomenon, but is the capability of someone to do that, of course could be by intention and will and under control be caused and to using as very dangerous weapon that only "who" with the same capabilities could to interfere to, to coping and to deactivate that phenomenon, what means? The phenomenon being caused under control by a biological brain and another brain have to coping and deactivate the phenomenon would be an ultimate fight that needs endurance could last for enough time, compact personality and understanding of different intelligences, of course an by his creation indivisible "who", and of course beast instincts (the mother nature's physical creatures beasts "who" instincts and their beast souls) for as many time is be needed continuously defensive and offensive rotation in brain to brain, or in brain to brains interface and interaction and contingent simultaneously and in body-to-body, or body-to-bodies combat, until the Earth's "who" to be find the enemy(ies) weak points in deep his/their brains and that time they will retreat, the Earthy "who" is ready for that at least from his birth day and simultaneously and for body-to-body, or body-to-bodies combat from his teenage years, with his total Mother Nature's provenance and by his creation day armed by all the Mother Nature's beasts instincts and lessons indelibly by the same the Mother Nature, and now fifty years but always "who"], that really the gimbal the goast the Tic-Tac videos they do not prove anything, what do you say to that?

Answer: I am a physicist we live and die with the data we go where the data goes even if we have to be drag kicking and screaming into areas that we feel uncomfortable with we go where the data goes and the gold standard the gold standard for the data is multiple sightings by multiple modes now think about that throughout history people would say look, look Martha look I see something up there well maybe You did or maybe You didn't that is not reproducible and it is only You and perhaps You were drunk that day or perhaps you really did encounter something it is not conclusive what we need is multiple sightings by multiple modes meaning more than one person has seen something up there independently verified it with multiple modes that is radar infrared sensors optical sensors multiple ways in which we can then triangulate and then give You the data of what was up there.

[My own comments on the answer: In his answer professor Kaku refers that when we must move in unexplored and uncomfortable areas, we have to follow the data and the gold standard that as more the data more reliably our conclusions and as from more sources the data come from so more reliable the data base and the conclusions, and about these Unidentified Flying Objects and Aerial Phenomena and in order to be conclude reliable conclusions what we needs is multiple sightings by multiple modes meaning more than one person has seen something up there independently verified it with multiple modes that is radar, infrared sensors, optical sensors multiple ways in which we can then triangulate and then give You the data of what was up there [I was created by Mother Nature with the capabilities even more and to percept as and to interfere and to the space-time infrastructure in the range that extend my mighty energy "who" moving with almost the speed of light and always indivisible accompanied by the rests of my own natural cosmic mighty powers and forces "who" for sure cover all the planet Earth and extend and beyond the Earthy boundaries, so by my creation am and the most efficient mode in order to locate, to verifying, to recognizing, to make brain magnetic-ray to these extraterrestrial biological creatures and "who" only biological and in person could be inside their advanced flying machines (remote control from other planet simply impossible), but they the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation, since 1974-1975 perpetrating nazi crimes against me, prevent me and from to perceive them themselves, but they prevent me and from to perceive the extraterrestrial forms of life "who" coming in Earth "who" is and the first step of the purpose and destination of my creation to as the Earthy's "who" to counter-array against and opposite of extraterrestrial forms of life, that is, they decades now giving the possibility to extraterrestrial forms of life to hide with them behind their illegal, criminal, nazi criminal technical ways parasitizing from me, echelon machines, and they preventing me from my

destination and from the main purpose of my creation by Mother Nature, give them to extraterrestrials the opportunity to unidentified and uncontrolled to coming and to circulate under cover on Earth. And giving the fact that the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation, from many years ago, they and have stolen from me mine sperm and mine bone marrow and they by their own always premeditation and have murdered my own babies, I cannot know yet and what other crimes they can have perpetrated and what crimes they continue to perpetrate and with their informal extraterrestrial allies against me (the Earthy's "who") and against my own genus (the indivisible extension of the enormous Earthy's "who"), and that if they their extraterrestrials allies do not appear in person to UN, me and my own genus (I will pursue to make as many more children I can) will hunt them in all the universe and if it needs and beyond in the God's infinity creation.]

2nd Question: And that is and that's why those u.s. navy sightings from firstly 2004 and more recently right through to the present day are so important because they are getting multiple data on different platforms.

Answer: The recent pressure by congress on the military has forced the military to own up to the fact that it is sitting on hours, hours of videotapes of something that is up there in the sky and that many of the military men who have seen these things were told not to make waves do not make waves if you want to like make sure that your career is on the right track and so now the floodgates are being open in other words the burden of proof is now shifting it used to be that the burden of proof was on the individual to prove that there was something up there and that he wasn't drunk now the burden of proof is on the military to prove that these objects aren't extraterrestrial.

[My own comments on the answer: The recent pressure by congress on the military has forced the military to own up to the fact that it is sitting on hours, hours of videotapes of something that is up there in the sky [Hours of videotapes of something that is up there in the sky, where they the usa military forces so, obviously as themselves confessed and the most vital and existential for them (for all of them of the usa and of all the fourth nazi parasitic formation), and their illegal, nazi criminal ways parasitizing from me, their echelon machines from their echelon machines basements, decades now in essence the only that they could do were to watch (and obviously and the only that they continue to can do is to watch these) and recorded in videotapes many hours of they watching these sightings and nothing else], and that many of the military men who have seen these things were told not to make waves do not make waves if you want to like make sure that your career is on the right track [(and

that they the usa military forces and most possible the intelligence sector of their military forces (and the most classified the center (the core divided in cores) of all their intelligence agencies, and vital and existential for all of them (for all their fourth nazi, criminal, parasitic reich formation) their illegal, nazi criminally insane, harmful parasitic echelon machines basements) obviously and with orders from their political superiors (they from 2009 started and that their own website in order to advertised themselves but they continue to keep secret this information and to saying lies that they supposedly that would protected with their echelon machines the Earth of extraterrestrial threats and invasions, but as beyond any doubt is proved that they could not} {and obviously with coercive tactics against those who have seen this sightings prevented the information's from publication (obviously and in order not to prove the disability of their echelon machines basements to recognize and to counter-array extraterrestrial threats) and they keeping under secrecy from the public view the issue (for to not many humans and entities rebel against their underground echelon machines),}} and so now the floodgates are being open in other words the burden of proof is now shifting it used to be that the burden of proof was on the individual to prove that there was something up there and that he wasn't drunk, [but that now the data base about the issue have open, have declassified], now the burden of proof is on the military to prove that these objects aren't extraterrestrial. [I am not going never to leave my future and the future of my genus to these of many mental and intellectual disabilities suffered brain damaged nazis, I will continue to fight against all of them, against all of the fourth nazi, illegal, criminal, murderous, parasitic (echelon this time) reich formation until to victory against all of them, until the "liberation day" or until death, and in further analysis the death id better prospective from them]

3rd Question: What do you say, that though why do you say that the burden of proof is reversed I mean Your detractors have suggested you are going a bit far there why do you say that?

Answer: We go where the data goes and the data goes in the direction of so we follow the data and the data indicates that something is out there that can be tracked by radar, infrared centers, tracked optically, that can travel between Mach 5 five times the speed of sound up to Mach 20 now think about that for a moment up to Mach 20 this is far beyond commercial aircraft and yet here we have sightings that can be triangulated and analyzed using these videotapes we have gone frame by frame over the trajectories of these objects and we now realize that they can exceed the capabilities of our aircraft they can drop to

80.000 ft within just a matter of a few seconds they can zigzag and we physicists now have calculated the g-forces inside these whatever they are the g-forces are in hundreds of times of the force of gravity, (reference by the reporter: that it turn any human into PE soup), in other words it would crush the bones of any object any organism we are familiar with and so these objects are probably drones of some sort because they can exceed the capabilities of our aircraft and put pressures on the pilots that would crush their bones.

[My own comments on the answer: We go where the data goes and the data goes in the direction of so we follow the data and the data indicates that something is out there that can be tracked by radar, infrared centers, tracked optically, that can travel between Mach 5 five times the speed of sound up to Mach 20 now think about that for a moment up to Mach 20 this is far beyond commercial aircraft [I think that it is easy understandable that we have to do with something existing that from the moment in not Earthy the only explanation is that is extraterrestrial technology which of course, are driving, are navigating, naturally way are directing, extraterrestrial biological creatures] and yet here we have sightings that can be triangulated [after one about year of the "liberation day" when and enough or and many "mighty humans" will have born the whatever approach to the Earth's stratosphere not only will be triangulating but will be polygonising, analyzed, weapons deactivated, from many directions of the Earth surface, from natural cosmic powers and forces from many units of the Earthy "who", and giving plan of flight, and purpose of visiting and destination which directly will submitting to relevant UN office, then under continuous observation will be continued its flight according with its statement] and analyzed using these videotapes we have gone frame by frame over the trajectories of these objects and we now realize that they can exceed the capabilities of our aircraft they can drop to 80.000 ft within just a matter of a few seconds they can zigzag and we physicists now have calculated the g-forces inside these whatever they are the g-forces are in hundreds of times of the force of gravity, (reference by the reporter: that it turn any human into PE soup), in other words it would crush the bones of any object any organism we are familiar with [no one biological creature and whichever biological advantage and to have cannot endurance so large G-forces, me the Earthy "who" could not, so they must have develop some kind of technology that protect them from the large G-forces which occurred inside these objects from the so sharp changes of direction and change of altitude] and so these objects are probably drones of some sort because they can exceed the capabilities of our aircraft and put pressures on the pilots that would crush their bones [these objects exceeds the capabilities and from whichever known Earthy technology made

drones, and nowhere is mentioning their promotional system, they have turbines or rocket engines? like the of Earthy technology made flying machines? If yes, how is it possible with turbines or rocket engines to doing so sharp zigzag? And to move (with turbines and rocket engines impossible) underwater? And in outer (the turbines impossible needs oxygen and the rocket engines have little range) space? So, the only explanation remains that these objects are extraterrestrial, much more advanced from Earthy technology made machines seem to have abilities of anti-gravity and to use some kind of energy (type plank energy?), and of course not remote control from another planet from another solar system]

4th Question: Now the two intelligence experts from the u.s. defense. department who gave evidence on the 17th of May to congress Ron Moultry Scott Bray, two of the top officials in the Pentagon's intelligence section, they suggested very strongly that these were drones these anomalous objects to your knowledge though is there any known terrestrial human technology that is capable of what these objects have been seen doing?

Answer: Well if these objects can do what the data seems to indicate that they exceed the capabilities of even our drones we have Hypersonic drones that can go up to Mach 20 but they are unstable the united states had a very rigorous Hypersonic drone program up to two years ago but abandon it because when these things begin to maneuver they spiral out of control and then crash (that's why the Russians are pushing this technology) because they want to evade a star wars program by having maneuverable Rockets but You see that's the problem once they start to maneuver then small oscillations build up until they spiral out of control and then crash so, So far no one's been able to create a Hypersonic drone that can duplicate the feats that we see on videotapes.

[My own comments on the answer: In his answer the professor Kaku refers that the data seems to indicate that these objects exceed the capabilities of even from Earthy drones of the hypersonic drones programs that have countries as the united states and the Russia, and perhaps and China , and conclude that so far no one is been able to create a hypersonic drone that can duplicate the feats that we see on videotapes, {The usa pentagon of course known that these are not hypersonic drones neither from their own, nor from other countries, they the usa pentagon from the fourth's nazi, illegal, criminal, murderous, parasitic (echelon this time) reich's formation their illegal, nazi criminally insane, harmful parasitic echelon machines basements with their illegal, criminal, nazi criminal ways parasitizing from me, their echelon machines surveillance all the Earth (and Russia, and China), even and their own country the usa, so of course they known

that are not drones neither from Russia, nor from China, and sure nor from their own country, but emerge and a question more, from the time that they of course without to have never any right but as they illegal, criminal, and nazi criminal technical parasitic ways, surveillance all the Earth why they (the usa pentagon's intelligence services sector) have not locate never where these flying object have base on Earth? Somewhere on Earth these objects must some time and for various reasons be forced to land (as for example for refueling, and for technical support) a place sure on Earth and so included in UN international territory where representatives of UN on behalf the security of all Earth could check, so at least to be ascertained and to be exclude the possibility these objects to constitute threat for the Earth. So, what's about? And what's about, without answer to be judge as very strange their (the usa) behavior and on that matter]]

5th Question: Do you see any evidence to Justify a conclusion that these might be foreign adversaries

Answer: Well when You look at the Pentagon's statement on these object it lists the various possibilities weather anomalies and so on and so forth and at the end the last option is "other" now what does that mean, "other," well realize that the Chinese have a Hypersonic drone Program the Russian have an operational Hypersonic drone Program that they are using in the Ukraine the united states is now reinvigorating and refinancing see is Hypersonic drone Program but these are all experimental and the track record of these Hypersonic drones is not very good and You realize that these sightings go back decades decades before anyone even conceived of hyperconic drones, (reference by the reporter: so what are they?), so we are left with the last option and that is "other" and "other" includes well maybe a renegade country just like if You watch James Bond movie there's always some Smur or Spectre out there that has a secret program with access to Advanced Technology maybe a James Bond type secret organization and for the first time the military is not immediately excluding the possibility of their being extraterrestrial this is new in other words one military official was quoted as saying quote they are not ours and if they are not ours then whose are they if they are not the Chinese if they are not the Russians if they are not us then what's left, (reference by the reporter: could it be ET?), some are left with the possibility now and the military is now coming up to this that they could be extraterrestrial and this is new before the military would try to debunk these things saying that maybe they are stealth bombers maybe they are Chinese or the Russians technology the but the military is now admitting that yeah they they are not ours.

[My own comments on the answer: Well when You look at the Pentagon's statement on these object it lists the various possibilities weather anomalies

and so on and so forth and at the end the last option is "other" now what does that mean, "other," [the usa's call them as "others" letting to implying that they who, are they "who"? who are found inside these obviously extraterrestrial flying machines and aerial phenomena machines are someone's superiors analyzing their technological characteristics, from technologically view seems to be in some extent (to what extent?) and biologically extraterrestrial "who" otherwise they could not have such advanced five observables abilities as seems to be technology) call them the "others" implying that they are something superior from who? Are sure superiors from them the usa's themselves that call them with a mysticism mean as "others." I refuse that they the supposedly "others" have not origin? Have not provenance? From somewhere come from, they are not "others" and must have some history, what is his history? The history of their planet? The history of their kind of their planet? Are they representatives of some planetary organization of their planet (as kind as UN organization?) or are they nationals of some delimited geographical area (country/state) of their planet? Under what kind of governing? How many delimited geographical areas (countries/states) there are in their planet? What their histories? What are their ideals and values? What about their cultures and their religion beliefs? They are not "others" they are unknown to us, and they by their own choice and pursuit stay unknown to us, and at least I must keep defensive attitude against and opposite of them. What are their interests? Why they can fulfil their interests on Earth only if they stayed hide from us? they are not superiors of me, and they are not superiors of my own provenance, my provenance gave me the capability to face them as equal (and having and advantages against and opposite them) of any kind of view, the fourth's nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich's formation, their illegal, criminal, nazi criminal technical ways parasitizing from me, their echelon machines and echelon machines basements prevent me from me to recognize them, to define them, to communicate with them, to learn about them, to assess their attitudes and purposes? And to inform the UN, and to apply and impose the decisions of UN to them? And if it is needed even and in other planets to them. Why they prevent me the Earthy's "who" and my own genus the always indivisible from me the enormous Earthy's "who" from my purpose and my destination?] well realize that the Chinese have a Hypersonic drone Program the Russian have an operational Hypersonic drone Program that they are using in the Ukraine the united states is now re reinvigorating and refinancing see is Hypersonic drone Program but these are all experimental and the track record of these Hypersonic drones is not very good and You realize that these sightings go back decades-decades [I was created and born five decades ago they the usa's decades now hide in their basements and prevent me to do what Mother Nature created me to do, and my mainly purpose of my

creation was and is to counter-array to extraterrestrial "who" and to counter-array them and biologically (I must have made children and many children from my fifteen years yet), but and technologically (the UN must not only to walk, must to run now), and as they the underground echelon's and Jason's behave so many years to the planet and of course the legal ones have and to revive the cultures and the religion beliefs, and the humane ideals and values, the constants of the human existence, the enemy is not only just before the gates, are find with secrecy in the planet Earth] before anyone even conceived of hypersonic drones, (reference by the reporter: so what are they?), so we are left with the last option and that is "other" and "other" includes well maybe a renegade country just like if You watch James Bond movie there's always some Smur or Specter out there that has a secret program with access to Advanced Technology maybe a James Bond type secret organization [they are not "other", and they are not movie heroes and they are not heroes at all, they are not ETs, they are invaders, they stay under concealment and in secret decades now, they coming, are not visiting, they are coming, they possible are some kind of military persons of their planet, of all their planet? Of some delimited geographical area of their planet? Do they come from one only planet? Are they political representatives of their planet? I do not think so, If they were/are political representatives of their planet they had gone to appear in person to UN] and for the first time the military is not immediately excluding the possibility of their being extraterrestrial this is new in other words one military official was quoted as saying quote they are not ours and if they are not ours then whose are they if they are not the Chinese if they are not the Russians if they are not us then what's left, (reference by the reporter: could it be ET?), some are left with the possibility now and the military is now coming up to this that they could be extraterrestrial and this is new before the military would try to debunk these things saying that maybe they are stealth bombers maybe they are Chinese or the Russians technology the but the military is now admitting that yeah they are not ours. [They the usa's could not ever and they can never to counter-array from no one point of view against or opposite of any extraterrestrial forms of life (and certainly serious unidentified and unrecognized threat) nor against or opposite of any one else threat against planet Earth, they were and are underground nazi, illegal, criminal, murderers and murderers of unborn infants, and underground nazi parasites themselves sworn enemies of my own (the Earthy's 'who'), of the souls of those of my own biological descendants "whom", they and always by their own premeditation unborn murdered (in the gestation stage of their lives units of the indivisible from me enormous Earthy's "who") and of all of my own genus the always indivisible from me enormous Earthy's "who", as they are and sworn enemies of all the Mother

Nature, and of all the planet Earth and its environment the universe, and nothing else]

6th Question: Do you think the united states knows a lot more than it's letting on?

Answer: The question is, is the united states hiding something well of course I mean we pay spies to keep secrets not to divulge secrets we pay generals to win wars not to lose wars of course there's going to be a stockpile of stuff if I was in the military and I was in charge of this material I too would be stockpiling lot of this material but the key things is, is much of this data is now slowly being revealed and the data you go where the data goes and the data points to a technology that seems to exceed our capabilities even today.

[My own comments on the answer: The question is, is the united states hiding something [First of all they hiding themselves decades now (from 1974-1975) , in their nazi echelon machines basements and in there they hide these (echelon machines) and themselves hide behind these their echelon machines] well of course I mean we pay spies to keep secrets not to divulge secrets we pay generals to win wars not to lose wars, but to win wars [They conduct since 1974-1975 a total nazi, criminal, genocidal nazi murderous, dirty under cover and for some years now in open view, but in coverage and behind their lies, slanders, false accusations, of their purposes, war against me and against my own genus, and against all the mother nature, but eventually they uncovered and instantaneous after they lost this war and now they refuse to unconditionally surrender to UN, and the only can do is they to wait the "liberation day" to break out against them. And hiding in their caves and behind their nazi parasitizing midst's for technical support of their lives their echelon machines could not ever to win no one war, neither even to continue themselves to exist, and they have stuck and technologically decades ago before the 1974-1975 and since then they have lost and every basic element of humane existence, since then they could not even to exist] of course there's going to be a stockpile of stuff if I was in the military and I was in charge of this material I too would be stockpiling lot of this material but the key things is, is much of this data is now slowly being revealed and the data you go where the data goes and the data points to a technology that seems to exceed our capabilities even today. [and they were keeping decades back technologically and the UN with result the UN could not even to follow the universal technology and proven the extraterrestrial forms of

life continue to are visiting the Earth unidentified and uncontrolled having in their possession advanced technology that seems unreal to Earth's]

7th Question: You are one of America's most highly respected theoretical physicists I reckon you have got networks are you hearing anything in the traps is there a program going on, are there physicists who are working for some secret government program that You know of?

Answer: Well there are physicists who do work for secret programs one of them is "Jason" for example some of the top physicists that I know personally have actually worked for "Jason" but to my knowledge working on flying saucers and stuff like that is not part of their of their mandate however working on extraterrestrial modes of transportation is, and so these organizations have in fact looked at what it takes to create an object that can, can exceed the speed of light [they would disposal to UN, would placed under the management of the UN these flying for the space objects?, (reference by the reporter: are they anywhere near it do You think?), no I have seen a lot of the proposals by people from "Jason" and by other groups like DARPA that have looked at this in fact nasa had a 100-year starship program a program whose official title was the 100 Starship and they said that within 100 years nope (and after more than 100 years?) we are still not going to be able to approach a going faster than the speed of light but is it possible to exceed the speed of light? and the answer is yes now, (reference by the reporter: sorry just for a moment sir, I mean I thought Albert Einstein's theory of relativity made it absolutely impossible to exceed the speed of light), people forget that Einstein had two theories not one theory of relativity the first Theory says yes Einstein is the cop on the Block You cannot go faster than the speed of light that's the special theory of relativity but later he created a more powerful general theory of relativity that showed that space itself is like a fabric, a fabric that can be stretched and perhaps even ripped and if You could rip the fabric of space and time then we are now talking about Hyperdrive Technologies.

My own comments on the answer: Well there are physicists who do work for secret programs one of them is "Jason" for example some of the top physicists that I know personally have actually worked for "Jason" but to my knowledge working on flying saucers and stuff like that is not part of their of their mandate however working on extraterrestrial modes of transportation is, and so these organizations have in fact looked at what it takes to create an object that can, can exceed the speed of light [they would disposal to UN, would place under the management of the UN these flying for the space objects?] [The u.s.

must have many secret programs like that "Jason" which have relation with physic and which all of these and this "Jason" is connected with their top classified secret, for them program with which they steal and illegal, nazi criminal ways and perpetrating nazi crimes they can have illegal, criminal, and murderous ways access to natural cosmic powers and forces of the Mother Nature's creation the Earthy "who" and of course I am referring to their illegal, nazi criminally insane, murderous, harmful parasitic echelon machines basements in which they have and operates their illegal, murderous, nazi criminal ways parasitizing from me, and extremely dangerous for the entire planet Earth their echelon machines with which their echelon machines perpetrating crimes against the Earthy "who" give the opportunity to extraterrestrial forms of life with their obviously more advanced, from the Earthy, their extraterrestrial technology to visiting (coming) in status non identified and uncontrolled from decades ago the our planet Earth] (reference by the reporter: are they anywhere near it do You think?), no I have seen a lot of the proposals by people from "Jason" and by other groups like DARPA that have looked at this in fact nasa had a 100-year starship program a program whose official title was the 100 Starship and they said that within 100 years nope (mine note: and after more than 100 years? The Earth have not so much time), we are still not going to be able to approach a going faster than the speed of light but is it possible to exceed the speed of light? and the answer is yes now, (reference by the reporter: sorry just for a moment sir, I mean I thought Albert Einstein's theory of relativity made it absolutely impossible to exceed the speed of light), people forget that Einstein had two theories not one theory of relativity the first Theory says yes Einstein is the cop on the Block You cannot go faster than the speed of light that's the special theory of relativity but later he created a more powerful general theory of relativity that showed that space itself is like a fabric, a fabric that can be stretched and perhaps even ripped and if You could rip the fabric of space and time then we are now talking about Hyperdrive Technologies. [As I have already mention this report consist part of one of my own total report/proposals to UN for lawful from legal ones research and always on the surface of Earth for obtain of ultimate understanding and knowledge of natural cosmic powers and forces, and for real progress and advanced technological and real and lawful technological superiority for the Earthy's at least for the legal ones of the Earthy's (one of my wishes is soon the legal ones to have make the Earthy advanced technology made space bolides for hyperdrive massive space velocities) , in relation and in opposite of any advanced extraterrestrial technology and of any underground Earthy technology, we the legal ones do not need nothing from the illegals, nazi, criminals, and murderous "Jasons" and "echelons" undergrounds]

-Interrogative intervention by the reporter: So, there is a chap called Miguel Alc  ber who came up with this hypothetical concept of the Alc  ber drive. Can you explain to us what the implications are of his theoretical possibility?

-Continue of the answer: there are actually two ways you can break the light barrier consistent with Einstein's theory of general relativity the first was actually proposed by Einstein himself in 1935 in 1935 he looked at a black hole which looks like a funnel a funnel things fall into the black hole and then you put two of them two of them back to back so that if you fell into this funnel you would come out the other end and that's called a wormhole which Einstein worked out with his student Nathan Rosen back in 1935 and you can actually go faster than the speed of light by going through the wormhole, now you have seen this before as a child you have seen this before the first reference to a wormhole in the English language was done by Charles Dodgson otherwise known as Lewis Carroll in the book "Through the Looking Glass" the Looking Glass is the wormhole Alice sticks her hand through the Wormhole. and her hand goes to the other side of forever which is Wonderland so that is the first way that you might exceed the speed of light using Einstein's general theory of relativity as proposed by Einstein himself in 1935.

[My own comments on the continuation of the answer: He refers to that: In actuality there are two ways you can break the light barrier consistent with Einstein's theory of general relativity. The first is relevant with the space bodies "horizons of factors", and that if you put two of them back to back, so that if you fell into the shaped funnel that they create you would come out the other end, and that's called a wormhole, and actually someone can go faster than the speed of light by going through the wormhole (As I have already mentioned I was created in June 1974 by Mother Nature as the Earth's entire gene chain's "mighty human powers and forces" - "who", the always mine the my own always indivisible but and always Earthy and inseparable from Earth "who" (and since then, since June 1974 has been confirmed this Einstein's Theory of General Relativity), and after the "liberation day" I will make and many, I want to make many children, many units of always, individually and collectively indivisible, Earthy "who" and soon and always under the auspice of UN, me and with me and of the Earth's at least the legal ones will have the ability to develop a really fabulous in amount of units (and fabulous in amount of plank energy and natural cosmic powers and forces "mighty human powers and forces") and enormous in extend collectively Earthy "who" from the Earth to some nearby star in an enormous "space hyperdrive corridor" for transportation that exceed beyond the speed of light and in space-time voyages, and the new name of this ability is "space hyperdrive corridor"]]

-Interrogative intervention by the reporter: And what's the second proposed way?

-Continue of the answer: The second proposal to exceed the speed of flight is to stretch space let's say You are walking on a carpet and you crumple up the space in front of you and expand the space behind You and then all You do is hop over the carpet so in other words you do not go to the stars the stars come to You, You are literally yanking the stars in your direction and then You are simply hopping over the distance.

[My own comments on the continuation of the answer: He refers that: The second proposal to exceed the speed of light is to stretch the space, if you crumple up the space in front of you and expand the space behind you, and then all what you have to do is hop over the carpet, you are simply hopping over the distance {The Earthy "who" me undaunted am able to warping, to distort the space-time infrastructure and after the "liberation day" and a brief university-level education through discussion under UN program with the representatives of the relevant scientific societies, I will have and the theoretical university-level education, so me to be able to advantage the most of it, my capabilities and especially after having the chance to reinforce with many units of "who" many of my own biological descendants of my own genus, my own natural cosmic mighty powers and forces in a collectively and always indivisible Earthy "who", we the Earthy's at least the legal ones if us will have and the required fabulous in amount energy, plank energy we can have and in positive and in negative morph this energy, and to structure and construction an warp bubble around of our technologically advanced "Earthy Space Bolides Objects" I will propose this characterization (ESBOs) and stretched, warping, distort the space-time infrastructure to doing space-time voyages in instantaneous velocities}]

8th Question: Now I want to take You through there's some complicated ideas here but I have had the privilege of interviewing the former head of the Pentagon's UAP Program a guy called Lou Elizondo and he uses this term the five observables I think he talks about instantaneous velocity, massively high velocities positive lift stealth and trans medium travel so there are five things that these objects have been recorded doing shown by the data is what these five observables are showing consistent with curva theory is it somebody's flying a craft that's operating using that stretching of Space Time. and warping of space time if you like is that is that what would explain what we are seeing with these objects in the sky?

[My own comments on the question (8th Question): Now I want to take You through there's some complicated ideas here, but I have had the privilege of interviewing the former head of the Pentagon's UAP Program a guy called Lou Elizondo and he uses this term the five observables I think he talks about instantaneous velocity, massively high velocities positive lift stealth and trans medium travel so there are five things that these objects have been recorded doing shown by the data is what these five observables are showing consistent with curva theory is it somebody's flying a craft that's operating using that stretching of Space Time. And warping of space time if you like is that what would explain what we are seeing with these objects in the sky?

[My comments about the question: Former head of the usa pentagon's UAPs program? (sure would have participated and their nazi echelon machines basements in their tries to locate and recognize the UFOs, but the only they can do is to watch and to calculate the capabilities and abilities of these sightings and nothing else, they cannot neither to recognize their flying machines, how to come in communication with what obviously extraterrestrial creatures are found in these flying machines? Obviously, they cannot.) His name is Lou Elizondo, and he for many of these sightings (UAPs, UFOs) uses the term, the five observables? And the opinion of the reporter (and if someone disputes his explanation and wants to give another explanation, there is the UN, in writing to General Secretary Office, the matter is very serious) about this term is: A) Instantaneous velocity (My own note: perhaps a little distance warping of space-time infrastructure). B) Massively high velocities (My own note: perhaps in a great extent space-time wormholes). C) Positive lift? (My own note: what does it mean? Anti-gravity capabilities of these UAPs, UFOs sightings?). D) Stealth? (My own note: gateways in space-time and transporting through transition in other dimensions, in stealth from the simple brains conditions?) E) Trans medium travel? (My own note: Teleportation in a medium distance? And medium distance in accordance with what?)]

Answer: Well, I will be honest there is a catch there's always a catch always catch or else we would have had hyperdrive technology Yesterday right what's the catch the catch is energy you need fabulous amounts of positive and negative energy in order to propel yourself so that, you could exceed the speed of light for example the wormhole solution we find Wormhole solutions when we analyze black holes but a black hole requires the energy of maybe 10 to 50 stars so we are talking about stellar amounts of energy and the same thing for the ALCO bee Drive in order to create a warp bubble a warp bubble in which You can then hop over compressed space requires fabulous amounts of positive and negative energy the latest calculation that I have seen says that you have to have

energy comparable to the mass of Jupiter not a star, but just Jupiter in order to drive these things. So, in other words what we are talking about is a very advanced technology which is not for us we are talking about energy on a scale that exceeds the energy of the solar system.

[My own comments on the question: He refers that always there is a catch, or else we would have had hyperdrive technology yesterday (this yesterday in which he refers begins from the 1974 and is sure a yesterday from 1990. I was created in June 1974 and I am not hide never, and sure I could have made children from my fifteen years), the catch is the energy, it is needs fabulous amounts of positive and negative energy (many units or even and fabulous in number units of "mighty humans") in order to propel someone or an amount of someone units, so that they could exceed the speed of light, for example the wormhole solution. And that is need fabulous amount of energy (we the Earthy's at least the legal one's of us have in our possession the energy of the "horizons of factors" the plank energy, and of course, would there are and many legal forces of capabilities so that, the legal one's could have plank energy in fabulous amounts), and in order to create one or more warp bubbles (bubble on the same the basic space-time infrastructure, that needs to defying the laws of physics to can in some extent to presumption and to re-compose them with such way, so that we creating a new law of engineering that will allow us, so we, to fabric the bubble structure and its construction on the warp, and always in accordance with the fundamental physical laws, and always be governing by them, and in which then warp bubble we hop over and having the require fabulous amount of positive and negative energy that latest calculations shown must have energy comparable to the mass of Jupiter to compress the space-time infrastructure achieved instantaneous velocities that exceed the barrier of light speed. And he refers that in other wards we the Earthy's are lacking about a very advanced technology, and that which is not for us? Lacking about energy on a scale that exceeds the energy of the solar system (why, this advanced technology, is not for us? We have in our possession the origin from the Big Bang natural cosmic powers and forces "mighty human powers and forces", we have the capability and the knowledge to create, and we of course continue to have (and I do not want to lose neither even one of them) the forces of capabilities to give us the units for an really enormous collectively Earthy "who" that will emitting the fabulous positive and negative energy (plank energy) that we need to exceed the barrier of the speed of light, and to achieved and the five observables]

-Interrogative intervention by the reporter: Okay but somebody's doing that are not they I mean these objects do you think that what these anomalous objects are they do appear to be intelligently controlled don't they?

-Continue of the answer: When you talk to the average physicist about going faster than the speed of light you get what is called the giggle factor their eyes kind of like roll up to the heavens and they start to laugh and giggle and they say look the distance between stars is so great that it would take thousands of years to reach the nearby stars and what saying Extraterrestrial civilization action is going to invest thousands of years to reach the planet Earth It is just not common. sense however that assumes that the aliens are maybe a hundred years more advanced than us open Your mind to the possibility that they could be thousands, millions of years more advanced than us then new forms of technology begin to open up we are not talking about the very edge of our understanding of the Quantum Theory and general relativity at that point new phenomenon start to enter into the picture phenomenon that allow You to exceed the speed of light Stephen Hawking the late great cosmologist even said that yes with wormhole it may be possible to break the light barrier using Einstein's theory and the Quantum Theory and so open Your minds to the possibility that they could be millions of years ahead of us.

[My own comments about the continuation of the answer: He refers that when someone and (for example he himself) talk to the average physicist about going faster than the speed of light get what is called the giggle factor, and that they, say that the distance between the stars is so great that it would take thousands of years to reach the nearby stars, but this sense however that assumes that the extraterrestrials are maybe a hundred years more advanced than the humans, and with open mind thought can assumed and the possibility that they could be thousands, or millions of years more advanced than the humans (to refer that according with the most calculations by the physicists is common admissible that the universe began to created after the Big Bang (11) eleven billions years ago about, our planet, the planet Earth shaped about four and half million years ago, and the existence of our Mother Nature beginning about three and half billion years ago. So, there is a wondering fir that what in all over the universe from the Big Bang eleven billion years until the beginning of our Earthy Mother Nature three and half billion years ago? A total amount of seven and half billion years?

And as more advanced then new forms of technology begin to open up, and if we are talk about the very edge of the understanding of the Quantum Theory and General Relativity at that point a new phenomenon start to enter into the picture phenomenon that allow someone to exceed the speed of light, and that the cosmologist Stephen Hawking even said that with the wormhole it may be possible to break the light barrier using Einstein's Theory and the Quantum Theory, so someone must have open mind to the possibility that they (the extraterrestrials) could be millions of years ahead the Earthy's.

[As enough time I have refer ad describe the

Earthy "who" was created (me was created) in June 1974 and with the capability and to exceed beyond the speed of light and to doing space-time voyages, so and with great perceptance and greatness in practice knowledge and understanding of the mentioned Theories, and with open mind thinking the possibility that extraterrestrial forms of life could be millions of years ahead of Earthy's, and emerge the pondering of what point of view, of what the fields they would consider, encounter, ad counter-array opposite the Earthy's? And mostly opposite the humans? What we humans, the UN have of any point of view, of each field to demonstrate, to encounter, and to counter-array, relation and opposite of them? The extraterrestrials? And about these sightings of Unidentified Flying Objects? These by common admission are not Earthy, they exceed very much in capabilities the whichever of Earthy technologies, and they reach in accordance and with what I read and analyze in my reports and the so called five observables which referred and in the begin of this 8th question of this interview, and that all the data demonstrates that they are extraterrestrial objects , and which interview and I quote in the total report which consists of my own three reports of the relevant three videos of Professor Michio Kaku, and which total report is consist and one of my own Report/Proposals to UN, (the total Report/Proposals of, 1st Michio Kaku on Aliens Brains, 2nd Michio Kaku why 10% of UFO sightings remain unexplained, 3rd Professor Michio Kaku & Ross Coulthart Interview, the three aforementioned in one Report/Proposals). And why the obvious extraterrestrial forms of life finding inside these objects (they could from another Solar System to remote control the flying objects? The answer of course is no, maybe they have somewhere on planet Earth secret base? The answer the most possible yes, but these objects exceed the capabilities of every Earthy technology, so they could not without the manufacturing ability to construct these flying objects on Earth. They were visiting (coming) from decades ago the Earth, and they are continuing to visiting (coming) from a far distant from us place of the universe, and why they are stayed hidden behind their flying machines? Tey so many years have studied all the Earthy life and of course they know about the UN, why they were hidden and why they continue to hide from the UN? Are they an extraterrestrial "who"? But then why do they not reveal to UN? With this Report/Proposals as and with all the rest of my documents, my submitted lawsuits, and with all my writings and comments, I am designate retrospectively my own and of my own genus creation, and my own and of my own genus existence (and I was created and exist since the June 1974 and determine who will be (and who would be from 1975) my own and that of my own genus-my own tribe's path after the "liberation day",and as I have already mentioned in my Report/Proposals after "liberation day" I will pursue in program under the auspice of UN, where we will have the chance, me to have discussions especially with representatives of

societies, of the physicists, mathematicians, astrophysicists, physicists-mathematicians, and cosmological, and all we together, fir beginning, in common theoretical researches to analyze the Cosmological Theories, as are, the Theory of Strings, the Quantum Theory (and Quantum Engineering), the General Relativity Theory, the Theory of Professor Stephen Hawking about the relation of the "Horizon of Factors" as gates to other dimensions and other universes, and to correlate these Theories, and the connections between them, and to obtain advanced knowledge that will allow us to overcome whichever advanced extraterrestrial technology, and we the Earthy's at least the legal ones of us and to be in position of power in whichever chance we have to encounter extraterrestrial life.

-Interrogative intervention by the reporter: So that's the theoretical possibilities that you say are plausible possible something's doing that though is not it in our atmosphere under our ocean in Orit.

-Continue of the answer: When we talk about going fast in the speed of light you have to leave the technology of the planet Earth we physicists rank civilizations by energy a type one civilization is planetary they control the weather, they control earthquakes, volcanos, anything planetary they control sort of like living in the world of Buck Rogers or Flash Gordon then there is type two which is stellar these civilizations control the power of a star the output of a star like for example a Dyson Sphere which envelops an entire star and uses that energy to propel its machines and then we have type three, type three is the energy of a Galaxy they roam the galactic space Lanes, now Star Trek for example would be a typical type two civilization you can colonize a few star systems but not much more than the so-called Alpha sector of the Milky way galaxy that's Star Trek, Star Wars would be type three where you roam across the galactic space Lanes now these civilizations that we are hypothesizing about can they have hyperdrive and the answer is possibly yes by the time You are type three you can access the plunk Energy, the plunk energy is the energy you find in the heart of a black hole the Big Bang it is the point at which space becomes unstable wormholes start to emerge, (reference by the reporter: is this also what they call Zero point energy?), this is beyond Zero Point Energy this is the ultimate energy of the Universe itself, the plunk energy that's the energy that I work with when I publish papers I publish at the plunk Energy the Energy at which space and time become unstable for example let's say I have some water and I heat it up what happens, it starts to boil bubbles form that expand and you get what's called a phase transition now let's talk about empty space, empty space that's heated up, heated up to the plunk Energy what happens bubbles form little bubbles these bubbles are wormholes gateways to perhaps other parts of space and time. and so these bubbles is probably how our universe got started, our universe was probably one

of these bubbles floating in the vacuum and one of these bubbles expanded to create our universe, so if you are type three you can begin to play with baby universes you can begin to play with the plunk energy the energy at which space becomes unstable that space becomes full of Bubbles and these bubbles are gateways.

[My own comments about the continuation of the answer: He continues his answer by referring to the tree types of energetically categorized civilizations, and he mentions that when they, the physicists talk about going fast at the speed of light then someone must leave the technology of the planet Earth, they the physicists rank civilizations by energy.

And first he refers to type one that: Type one civilization is planetary they control the weather, they control earthquakes, volcanos, anything planetary they control sort of like living in the world of Buck Rogers or Flash Gordon, (To mention that I was created by Mother Nature with the capabilities of which the Michio Kaku gives to the type one: I can control the weather and in cooperation with UN scientific representatives I will help to improvement of the climate and environmental conditions. I can to predict the earthquakes and to reduce the catastrophic results of an earthquake and to help in avoidance of many of the deaths that occur in such geological events. For sure, I can measure and assess the status of the volcanoes and when these will be erupted. About his mentionings to hollywood movies heroes Buck Rogers and Flash Gordon, I do not watch hollywood movies, but to mention that in my younger age I was enough fast in my move, and always my mighty energy moving with almost the speed of light. So of course and we the Earth at least the legal ones of us could be and we can to be find in the of energetically category of type one civilization.

In continue he refers that: there is the type two which is stellar, and that these civilizations control the power of a star, the output of a star like for example a Dyson Sphere which envelops an entire star and uses that energy to propel its machines, now Star Trek for example would be a typical type two civilization you can colonize a few star systems, but not much more than the so-called Alpha sector of the Milky way galaxy that's Star Trek, (We I was watching before many years, in my teenage years this television series and of course I made dreams about. I did not know then that I am created mighty human by Mother Nature, and I had the impression as and until the 2013 that I was a simple human, an always straight and strong man but without to have knowledge about the issue a simple human. And now from some time ago having enough knowledge about the whole issue, and by alone me being made research on internet against all of them, that is, against the fourth nazi, illegal, criminal, murderous, parasitic (echelon this time) reich formation (against the usa and against the rest of ukusa agreement states and against the greek state), and

against all of the nazi criminal parasitic echelon conspiracy I found out by alone me and how much great and mighty were from my creation and always continue to be the always mine my own "mighty human powers" and after much research and deeply reflecting by myself on myself, my provenance, the provenance of the my own mighty powers the natural cosmic mighty human powers that me by Mother Nature I was created to possess and the capabilities that the whole my total provenance (and I am not dispute never the intervention, interposition, and contribution of the God in the creation and existence of Mother Nature and her creations) gives to me and through me and since the June 1974 and to my own genus, I defined my entire own self (my own human self and my own mighty human self that us always and since my creation one and indivisible whole, and so in relation with me and for all of my own biological descendants (and in relation of my all biological descendants among each other of all them) for the all of my own genus) and my entire own genus, as the by the entire Earthy's Mother Nature's gene chain created Earthy "who"

And he close his reference to types of civilizations mentioning that: After the type two, we have type three, the type three is the energy of a Galaxy they roam the galactic space Lanes, and he refers as example a hollywood movie the Star Wars (I have not watch this movie, I do not know the scenario) would be type three where you roam across the galactic space Lanes, now these civilizations that we are hypothesizing about can they have hyperdrive? and the answer is possibly yes, by the time you are type three you can access the plunk Energy, the plunk energy is the energy you find in the heart of a black hole the Big Bang (the natural cosmic mighty powers and the mighty forces who I was created by Mother Nature to possess and to can use the mighty human powers clearly have origin and from the space bodies "horizons of factors" and their capacities and their fundamental characteristics clearly indicates that the energy who I was created to emit is type Plank Energy). And he continues about saying that: The Big Bang, the plank energy, is the point at which space becomes unstable wormholes start to emerge, (reference by the reporter: is this also what they call Zero point energy?), And he continues his answer: This is beyond Zero Point Energy this is the ultimate energy of the Universe itself (To note at that point that the our Earthy clearly powerful entire gene chain created as biological existence that she is an of course biological creature (she always create biological evolutions in order to be protected, never machines she never need machines, and her creations never need machines in order to realization of the destination and the purposes of their creation by her) the humane variation of "mighty human" with of course his biological limits but she creates of her biological creations the most powerful that can to be created (in the universe) and the greatest beast of the our Earthy Mother Nature's beasts ever the "mighty human beasts" the

Earthy "who" that is and the most powerful and strong of the "who" that can be created in the universe and from extraterrestrial entire gene chains only equal in powers and strengths "who" could to be created, could not ever and cannot ever most powerful nor most stronger from the Earthy "who".

The Plunk Energy the Energy at which space and time become unstable (To note that I am biological creature human the variation of "mighty human" and of course as human created to live to move and in rural sparsely populated and in urban densely populated areas, so Mother Nature had to create a biological organism who am me, to have all the time under my total control the natural cosmic powers "mighty human powers" that she was created me to possess and to can under my own control to use and handle, and as me, me the progenitor, as and for all of my own biological descendants for all of my own genus so the mother nature copied and adapted to biological needs and humane living conditions these natural cosmic powers "mighty human powers", so the my own type plank energy "mighty human energy" that I was created to emit is be able to extend in all the range of intended since my creation his extension and in accompanied as indivisible that they are of my own natural cosmic "mighty human powers" to penetrate in his range extension the whole structures of space-time infrastructure so and of all of the visual perceptible creations and in a free state without in any way to disturbing the structure and function of no one of the visual, or unvisual from the simple mind, creations.... for example let's say I have some water and I heat it up what happens, "it starts to boil bubbles form that expand and you get what's called a phase transition" now let's talk about empty space, empty space that's heated up, heated up to the plunk Energy "what happens bubbles form little bubbles these bubbles are wormholes gateways to perhaps other parts of space and time". and so, these bubbles are probably how our universe got started, our universe was probably one of these bubbles floating in the vacuum and one of these bubbles expanded to create our universe (is the opinion and explanation of Professor Michio Kaku about the creation of the universe, which his explanation as and himself had stated does not exclude the creation of the universe by the God, and according with which is drawn the conclusion that the whole creation is really infinity, and my opinion on that is that undoubtedly only the God could make this whole creation, as and the universe in which and we the Earthy's in general exists, and no one else). So if someone (he/she/they) is/are think that (he/she/they) is/are type three (but think or perpetrating nazi crimes pretend that is type three, but in reality is/are underground zero, as zero are the fourth's illegal, nazi, criminal, murderous, parasitic (echelon this time) reich's formation their nazi illegal, nazi criminally insane, murderous, harmful parasitic echelon machines basements in which basements resident all the aforementioned fourth nazi parasitic formation, but

as are and as many other resident (if and others resident) in these basements) then can begin to play with baby universes, {To note that I am not universe, and as me, me the progenitor, so and my own biological descendants, all of own genus (an indivisible whole) is/are not universes, and neither me nor someone of my own genus could ever to create a universe, and the extension of my own, and of all of my own biological descendants of all of my own genus, natural cosmic "mighty human powers" have a range of extension not beyond the solar system, I could not never me, nor thousands units together of my own genus to create a universe never, I am not the God nor the Jesus, and I am not neither envoy of the God, nor me and so nor my own genus}, and to add that: {is/are very danger for someone(s) himself/themselves and for their around of (inside the range where extend these natural cosmic mighty powers) him/her/they to try to play with such enormous natural cosmic mighty powers and to try exploit such powers for his/her/their own interests }, someone can begin to play with the plunk energy {someone not me and never me, me am not someone, from my creation in June 1974 that was my own and my own genus creation an indivisible always whole, since then I am indivisible me and my own genus, the Earthy "who", and the purposes of my creation and my destination is not to play with my always own natural cosmic mighty powers and forces that I was created to possess and to can use and handle, but I was created with the knowledge how for the right purposes to use and hand with properly and always lawful manners, my own mighty powers and forces for purposes of defense and protection of mother nature and entire planet Earth as well as and with the knowledge and intention to drive the road ahead to the future (at least for the legal ones who are and those who can walk this path), to the progress in any sector, to the prosperity, to the open horizons in the universe-to the limitless and timeless open horizons that since June 1974 have been resulted for the Earthy's to the universe, and as for me, me the progenitor, so and for all of my own biological descendants, for all of my own genus "mighty humans" and I would preferred, not alone me in accompanied only of my own genus, but me and my own genus to drive the road ahead in cooperation and as representatives of UN), the energy at which space becomes unstable that space becomes full of Bubbles and these bubbles are gateways, {according with the last Theory that Professor Stephen Hawking had formulated before he died that the "Horizons of Factors" also constitute and gateways for other dimensions and other universes and the opinion of Professor Michio Kaku that in fabulous amounts positive and negative energy (obviously and Plank energy") can create warp bubble which someone who could hop on in this bubble (obviously who can make this bubble) could exceed beyond the speed of light in the space-time voyages, is drown and the conclusion that with this way could someone that could make this bubble to be

transferred from one point of the universe through other dimensions to another point of the universe in stealth from the simple mid conditions}.

9th Question: Statistically knowing the incredible awesome size of our universe there's every likelihood absolute certainty really isn't there that there are civilizations non-human civilizations out there far more advanced than us.

Answer: When you look at pictures from the hub Space Telescope and the Hubble Space Telescope realize that many of these pictures are just one little Pinpoint one little Pinpoint in the night sky magnified to give these gorgeous pictures You see on TV right well that little dot that Pinpoint of light contains trillions of stars each dot in that photograph that you see on National Television each dot is a Galaxy that's a 100 billion stars in each Dot and how many dots are there in that Pinpoint billions what we are talking about is a photograph of trillions, trillions of stars think about, about that for a moment the probability that we are the only game in town is a fraction the inverse of trillions and so you begin to realize that of course they are out there of course, why should we be special? for example look at what we are made out of we are made out of proteins and amino acids we find them in the heart of meteors we find amino acids in gas clouds nebula thousands of light years from the planet Earth we see the ingredients of life the amino acids everywhere we look in the universe.

[My own comments on the answer: When you look at pictures from the hub Space Telescope and the Hubble Space Telescope realize that many of these pictures are just one little Pinpoint one little Pinpoint in the night sky magnified to give these gorgeous pictures You see on TV right well that little dot that Pinpoint of light contains trillions of stars each dot in that photograph that you see on National Television each dot is a Galaxy that's a 100 billion stars in each Dot and how many dots are there in that Pinpoint billions what we are talking about is a photograph of trillions, trillions of stars think about, about that for a moment the probability that we are the only game in town is a fraction the inverse of trillions and so you begin to realize that of course they are out there of course {would be very selfish for us the humans, we to support that we the Earthy's are the only that have the right and the privilege to resident (and to resident as we resident only to this very small part of the universe who is our planet Earth that in comparable with universe is about a grain of sand in the entire Sahara desert) in this limitless space (with many trillions of planets to are found in the so called as habitat zone of their solar systems and in other solar systems beyond our own and in other galaxies) which call as universe, and from the religion point of view would be by our part somewhat arrogant we the humans to be tried to limit the living creation of God only to life in our own planet Earth, and all the creation and

all the living creation in the universe governing from the highest constant that could exist, from the same the God the existence himself} why should we be special? for example look at what we are made out of we are made out of proteins and amino acids we find them in the heart of meteors we find amino acids in gas clouds nebula thousands of light years from the planet Earth we see the ingredients of life the amino acids everywhere we look in the universe. {and the same planetary conditions which have prevailed on Earth before three and half billions years when and began the living life on Earth, have been prevailed from the start yet of the creation of the universe and in many other planets in many other solar systems as and the matter of which are made we the humans and all the Earthy life there is in the whole universe, and elements of this matter have been proved that there are in the heart of the meteors as well as in gas space clouds}}

-Interrogative intervention by the reporter: So, if I ask Professor Michio Kaku are we alone what do you say?

-Continuing the answer: People ask the question are we alone? My attitude is of course what took you so long?

[My own opinion about the continuation of the answer is: that we the humans and the Earthy's in general are not the alone biological life in the universe there were from the beginning yet of the universe and there are of any point of view many margins to be occurred, to be created biological life and in other planets in other solar systems and in other galaxies]

10th Question: Let's look then at the phenomena as it is being recorded on all those sensor systems that we are describing let's just focus for example on the 400 incidents that the u.s. now admits formally to the congress a real unidentified aerial phenomena they can't explain them Professor, they appear to be intelligently controlled do You agree?

Answer: So far, the evidence seems to point in the direction that if these objects are extraterrestrial and I am not saying they are but if they are extraterrestrial then it requires a level of intelligence that exceeds what we have, exceeds the technology of the planet Earth, (supplementary question by the reporter: the implications of that then are that we are being visited?), you can't, I am a physicist you go where the data goes and when data point , points in the direction that we might be visited it is a possibility that we cannot neglect I mean are we the only sentient beings in the , in the universe? I do not think so.

[My own comments on the answer: {A level of intelligence that exceeds in levels, the level of a simple's human brain who created to understand the world by optical, was needs (and is needs) to exceed the level of understanding the environment (the world) of a simple's human brain in order to have the needed levels of advantage intelligence, so that to be able to understanding, to analyze, to under brain control's cause, and to under brain control's deactivate these Unidentified Aerial (anomalous? I do not think so) Phenomena. So the conclusion emerge is that demand a brain that can understand the word with more of the optical way that must have by his creation a (or more in one) brain advantage(s) that sure accompanied and from the whole biological organism advantages, a (or more in one) total advantages biological organic creature, that had/have and the knowledge so that, to can (for example for the Earthy territory, under the auspice of UN and in cooperation with legal ones) exceed the technology beyond of the simple/common technology of the existed on planet Earth technology (or to exceed on Earth the Earthy technology), so that 400 incidents be admitted formally of real Unidentified Aerial Phenomena that: can be tracked 1) by radar 2) by infrared sensors 3) to tracked by optically, they appear to be intelligently controlled that could have caused and by of an total advantages extraterrestrial biological organic creatures, similar mighty in relevance with the Earthy humane total advantages biological organic creature the human variation of "mighty human", the Earthy's "who"}

{My own note: the warping of space-time infrastructure by the moment that being caused under brain control from "who" have the capability to do that it is not an anomaly or an uncontrollable dangerous anomalous phenomenon but is the capability of someone to do that. Of course could be caused by intention and will and under brain control by someone "who" have the capabilities so, to be cause and to using that as very dangerous weapon, that only someone else "who" have similar capabilities could to interfere in that (and simultaneously to interfere and to someone's brain "who" cause that and "who" sure would try for his purposes to protect that), to coping this, and to deactivate that phenomenon. What does it mean? The phenomenon being caused under control by a biological with advantage brain and another biological with similar advantage brain have to interfere, coping, and deactivate the phenomenon, and that this/these would be an (or many in a row and against more than one foreign to Earthy's "who" brains) ultimate fight that needs, endurance (could last for enough time perhaps hours), compact personality and understanding of different intelligences, of course an by his creation indivisible Earthy's "who", and of course beast instincts (the Earthy's Mother Nature's physical creatures beasts "who" instincts and their beast souls) for as many time is be needed continuously defensive and offensive rotation in brain to brain, or in brain to brains interface and interaction (and

causing against them offensive similar, and more intense of theirs such phenomena, and causing that against them and in out of their the extraterrestrial's their offensive range), and contingent and if it needed and simultaneously and in body-to-body, or body-to-bodies combat, until the Earthy's "who" to be find the enemy(ies) weak points in deep his/their brains and at that time they will be retreat. The Earthy's "who" is ready for that at least from his birth day and simultaneously and for body-to-body, or body-to-bodies combat from his teenage years, with his total Mother Nature's provenance and by his creation day armed by all the Mother Nature's beasts instincts and lessons indelibly in his brain by the same the Mother Nature, and now fifty years but always the indivisible and inseparable from Earth, Earthy's "who" and with plenty of experience in body-to-bodies combats, with always compact personality, and fighting spirit and soul, and with plenty of military and law enforcement working experience}}

11th Question: Let me give you then the classic rejoinder that you get from the skeptics they say come on what why would aliens be visiting this planet why would anybody care a toss you know I mean we are Probably an insignificant bunch of carbon related to everything else in the universe why would they be bothered taking an interest in humanity.

Answer: Let's say you walking down a country road and you encounter a forest and you encounter a squirrel do you go down to the squirrel and talk to it well initially you may be curious about the squirrel and you want to like say a few things but after a while you get bored because the squirrel doesn't talk to you but do you encounter these squirrels Yeah but for the most part you leave them alone we are perhaps the squirrels in the forest and any intelligent civilization that can span across Stars would simply say well yeah they are curious they are interesting let's study them but for the most part we will leave them alone.

[My own comments on the answer: Let's say you are walking down a country road and you encounter a forest and you encounter a squirrel do you go down to the squirrel and talk to it well initially you may be curious about the squirrel and you want to like say a few things but after a while you get bored because the squirrel doesn't talk to you but do you encounter these squirrels Yeah but for the most part you leave them alone we are perhaps the squirrels in the forest and any intelligent civilization that can span across Stars would simply say well yeah they are curious they are interesting let's study them but for the most part we will leave them alone. {for as long as they can avoid to be recognized from us they leave us alone, that is, for as long as they will have the possibility to hide behind the fourth's nazi, illegal, nazi criminal ways parasitizing from me, their

echelon machines, they will leave as alone, but we must ready, (and the extraterrestrial forms of life that coming in Earth, as they having more advanced technology and many of them having and capabilities similar with 'mighty human' capabilities, would go and to enough other planets as themselves of point of power something that they know that the 'liberation day' they will lose forever their position of power, and they will have to reconsider their attitudes and their purposes and only related with the fact that they coming in Earth but in relation with their total existence in the universe. So the 'liberation day' in essence the Earthly, at least from the Earthy's we the lawful in essence will hyperkeratosis and the extraterrestrial forms of life that coming in Earth as possible allies of them in other planets in the universe, and this is the cosmological extension of the "liberation day", so from the Earthy's we the lawful must be prepared and in readiness to fight for our existence and our right to expand in the universe, and we to expand in the universe from position of power, without we even to the least to have loose neither morally, even to the least our right to counter-array extraterrestrial civilizations from position of power, in accordance with the humane ideals and values and in accordance with and the rest existential for the human existence constants, religion beliefs, cultures, savoir fair, but from position of power, neither one step back never the humane ideals and values and the humane existential constants are found above the same the life) me by my side I am ready, since 1974-1975 I am ready for this fight, I would want to have many of my own biological descendants of my own genus beside me to collectively act and collectively counter-array against and opposite of them of anyone extraterrestrial them, but and me by the conditions forced to stand alone of my own genus I have not no one fear, I have deep belief to God, I have trust to my own provenance, me rely as always me to my own strengths, to my own powers, and forces, and I will represent me the Earthy's "who" and my all of my own biological descendants all of my own genus the entire indivisible Earthy "who", that will continue my own genus to exist for as long as decide the God to exist, and sure the God will not leave the life on Earth to be lost, nor will stop the progress, either the prosperity, as he is always fair full and he always punishes the injustice and the criminal insult to the existence that he himself is, and the criminal insult to the creations that exist and live within all of his creation. And no one of the legal ones must have no one fear for the "liberation day", fear have, as always they had fear, the all of the illegals, nazis, criminals, genocidal nazi murderers, of all of the fourth illegal, nazi, criminal murderous, parasitic (echelon this time) reich formation, and of the whole nazi criminal parasitic echelon conspiracy}

-Interrogative reference by the reporter: but if that's the case if really they are not that fuss about us they do appear to be taking a close interest in things like

nuclear weapons facilities whatever they are there is a high precedence statistically of UAPs that have been witnessed over nuclear weapons facilities nuclear power plants places where the united states develops and processes uranium.

Continuing of the answer: There are two theories as to why we have an extraordinary number of sightings at military installations one Theory says that they are curious about how advanced we are I mean at some point , point can we destroy ourselves what happens if a war breaks out is our civilizations unstable so that's one possibility but there's another possibility and that other possibility is that's where the cameras are that's where the cameras are that's where the seasoned pilots are that's where we have aircraft not in the middle of the ocean but next to weapons facilities where we have a concentration of electronic technology of course we are going to see more sightings there because that's where the technology is not because they are more curious about us and our weapons program. (supplementary question by the reporter: So, do you think it's quite plausible that there is an alien civilization that's been taking an interest in planet Earth for quite some time?), There are some people who claim that perhaps these visitations go back thousands of years not just back to world war ii if you look at the Bible for example there are sightings in the Bible Ezekiel talks about the wheel the wheel in the sky for example in the chapter on Ezekiel so then the question is where we visited in the past? well I am a physicist we believe in data that is testable reproducible falsifiable and it's not testable it is not reproducible whether or not we were visited in biblical times but it cannot be dismissed.

[My own comments on continuation of the answer: There are two theories as to why we have an extraordinary number of sightings at military installations one Theory says that they are curious about how advanced we are I mean at some point , point can we destroy ourselves what happens if a war breaks out is our civilizations unstable so that's one possibility [If we consider this first one of the two theories about this their (of the extraterrestrials, and for reasons of abbreviation Exstret's) behavior, that is, the frequency of their occurrence at specific areas and points, this first theory examine their curiosity about how advanced the humans are, from the point of view, analyzing polysynthetic factors in order they to conclude if the humans could destroy ourselves, and what could happens if a war break out, if in that scenario the Earthy civilization is unstable, and if is unstable in such extent, so that the humans destroy themselves is one possibility, and the most frequently appearing's of their unidentified flying objects and aerial phenomena observed in usa (an extraordinary number of

sightings of these objects and aerial phenomena) over areas with military installations to be taking a close interest in things like, as are weapons facilities, facilities of programs for developing weapons, nuclear weapons facilities whatever they are there is a high precedence statistically of Unidentified Aerial Phenomena's that have been witnessed over nuclear weapons facilities, nuclear power plants, places where the united states develops and processes uranium. As I have already mentioned they the UAPs seems to have behavior characteristics so that we can suppose that they must be from a kind of military sector of their extraterrestrial civilization, and of course they have the polysynthetic and analytic thinking and understanding to analyze different of them intelligences, they of course from years ago have study and analyze the Earthy life, and me the Earthy's "who" I could not be an exception from their studies, but sure their priority for analyzing and understanding (one of the most common and cleaver military tactics is first to study and analyze the most powerful and forceful and perhaps and the only for them and in relevance with them Earthy force (the only at least defense force against for those, of all them, "who" cause the unidentified aerial phenomena) of defense capabilities against them); and through me, and they interfering (not directly to my own brain, as all these years I did not see any of these (neither been mentioned never) Unidentified Flying Objects or Aerial Phenomena to flying over the Argypoli-Attica where I resident, neither wherever else where I have gone) to the, and through the fourth's nazi, illegal, criminal, genocidal nazi murderous parasitic (echelon this time) reich's formation, their illegal, criminal, nazi criminal technical ways parasitizing from me, echelon machines, to my own brain they (and of them "who" the Aerial Phenomena that seems to have similar with me, in some extend natural powers and forces with) to analyze and of another more comprehensive point of view the life on planet Earth (and that indicated from the fact that they constantly fly over the their illegal, nazi criminally insane, harmful parasitic echelon machines basements), and of course they have perceive the always stuck on me the illegal, nazi criminally insane, harmful parasites echelon machines basements, the only completely weakness, completely without powers, which suffer from many mental and intellectual disabilities, which from many years ago have reject from themselves (as and all the fourth nazi, illegal, criminal, genocidal nazi murderous, (echelon this time) reich formation) all the humane existential constants (religion beliefs, cultures, social education , humane ideals and values), and which they illegal, nazi, criminal, murderous, nazi criminal technical parasitic ways with their echelon machines (they the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation are completely unstable and their instability reinforced and from the fact that they still even have, with always illegal, nazi criminal technical parasitic ways (their echelon machines), without me to have none manner to

prevent or to stop them, they continue have to my own natural cosmic mighty powers and forces), interfering to my own brain have access to my own natural cosmic mighty powers and forces "who," the Earthy's "who" that obviously is most powerful and forceful in powers and forces, from their own extraterrestrial "who" (an indication about that, they needs to fly close and over the military installations in order to study them, their powers must have less range from the range of Earthy's "who" powers and forces, first disadvantage for them, they shown interested for the factor (the echelon machies) that gives them coverage from the Earthy's "who", they show constantly interested for this factor, but they are not doing move to deactivate this factor (their characteristics show that they have the capability, if they wanted to deactivate the echelon machines, and the echelon machines basements, that prevent the Earthy's "who" me, from to recognize, analyze, communicate, and from to face in fight if it be needs them- these Unidentified Flying Objects and Aerial Phenomena's, they have obviously recognized that they cannot face it in a direct confrontation the Earthy's "who", they the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation and the extraterrestrial Unidentified Flying Objects and Aerial Phenomena's seems to have an informal alliance agreement between them), but obviously they the extraterrestrial "who" are sensitive in counter-array against the Earthy's "who", they cannot rely only to their own powers and forces, second disadvantage for them], but there's another possibility and that other possibility that's where the cameras are that's where the cameras are that's where the seasoned pilots are that's where we have aircraft not in the middle of the ocean but next to weapons facilities where we have a concentration of electronic technology of course we are going to see more sightings there because that's where the technology is not because they are more curious about us and our weapons program. [My opinion is that they will not any more give attention for the Oceanic life, they have many years, decades, where they study and the Oceanic life, now probably give not attention to Oceanic life (they give not attention "to squirrel") they are giving all their attention to the illegal, criminal, nazi criminally technical midst's (the echelon machines) that continue to gives them the opportunity to continue to coming (and not visiting) unrecognized and uncontrolled in Earth and the most probably to be serving unidentified and uncontrolled their own interests and gains against the Earthy's (if their interests and gains were/are not against the Earthy's they would have already make known their appearance and their attitudes), whichever and to be their interests maybe they to use the Earth as waypoint/intermediate station (in somewhat as point of reference and station for refueling) for somewhere else in the universe or maybe they to consider us the Earth as their backyard and in the case that lost this their ability they immediately to express hostility against us the Earth], (supplementary question

by the reporter: So, do you think it's quite plausible that there is an alien civilization that's been taking an interest in planet Earth for quite some time?), There are some people who claim that perhaps these visitations go back thousands of years not just back to world war II if you look at the Bible for example there are sightings in the Bible Ezekiel talks about the wheel the wheel in the sky for example in the chapter on Ezekiel so then the question is were we visited in the past? well I am a physicist we believe in data that is testable reproducible falsifiable and it's not testable it is not reproducible whether or not we were visited in biblical times but it cannot be dismissed.

(I was not living the years that are referring the Bible, the biblical years, so I could not do something else from to accept what the Bible write with manner and explanation of what write. As far as modern times are concerned and especially the nowadays, these UAPs and UFOs have recorder from decades ago to visiting (coming) and to continuing visiting (coming) to Earth, and the question why all these years duration? No big difference in Earthy life the last thousands of years (I am not the Jesus he was lived on Earth as divine-human hypostasis), and I could to refer the last thousand years and related with the subject that except the creation and birth of the humane variation of "mighty human", no other big difference in Earthy life, but even that this, they would not need decades in order to study and the variation of "mighty human" the Earthy's "who", and why they the extraterrestrial (in some extend and enough of them must be) "who" hide behind machines? Have they perhaps and probably sentient that the Earthy's "who" have by his creation advantage against them? And why the sworn enemies of Earthy's "who" and of whole the Earth do not "come out" from their illegal, nazi criminally insane, murderous, harmful parasitic echelon machines basements? Have and they are sentient that the Earthy's "who" is more powerful and forceful and have by his creation the advantage against their possible informal extraterrestrial allies? Against the extraterrestrial "who"? (In some of his references Professor Michio Kaku mention that these or at least some of these sightings shown the capability and ability to can move with the same easiness: in the air, into space, and under the surface of sea, my own possible explanation is that in combination of capabilities of "who" finds inside these obviously machines and of the abilities of the same itself the machines, that is, advanced technology machines with abilities to adaptive on capabilities of "who" finds inside them, and in combination of both they can make structure of warp bubble in the space time structure and to be moving on the space-time infrastructure and without inside these machines to be influenced from the large g-forces, and that is not scientific fiction is something that and we the Earthy's at least the legal ones of us have the capability and ability to made, and so we had from the 1975 and certain we had and could have and reinforced in fabulous amount of Earthy's "who" units from 1990 (so and in fabulous amount and of natural

cosmic mighty powers and forces), in my fifteen and onwards I could have made children}}

12th Question: There are a number of philosophers commentators scientists who have indicated that they have been approached privately by the u.s. government sections of the military the intelligence services to prepare america for the possibility of extraterrestrial life the philosopher Sam Harris said as much in a podcast last Year have you had any approaches from the u.s. government yourself? you would be a perfect person to explain it.

Answer: I personally am a little bit skeptical about plans of scientists and politicians to prepare for an encounter with an extraterrestrial civilization cuz I have talked to the C people and the C people are the people on the front lines, they are the ones taking all the flak, they are the ones in the front line talking about this and I asked them what about the protocols what about the press releases what about governments the United Nations what role are they going to play where are the plans and their attitudes is they do not Exist there are no plans do you believe that yeah I believe there are no plans because politicians always drag at the tail okay very rarely do you have a politician who farsighted and see the future no they see the past and as a consequence they do not want to have the giggle factor thrown at them they do not want to have people roll their eyes every time a politician starts to talk about these ancient civilizations, basically they hide their rear.

[My comments on the answer: I personally am a little bit skeptical about plans of scientists and politicians to prepare for an encounter with an extraterrestrial civilization cuz I have talked to the "C" people and the "C" people are the people on the front lines, they are the ones taking all the flak, they are the ones in the front line talking about this [These "C" people as the Michio Kaku name them are from decades ago these ones which are responsible they decades now hide in basements and from the basements falsely claiming that can to face extraterrestrial threats perpetrating nazi crimes first of all and with priority against "who" was created with the capabilities and main purposes of destination to counter-array these (and many "others" pending and asymmetric) extraterrestrial threats] and I asked them what about the protocols what about the press releases what about governments the United Nations what role are they going to play where are the plans and their attitudes is they do not Exist there are no plans do you believe that yeah I believe there are no plans [The whichever extraterrestrial threat represent threat for the entire planet Earth and for all the our Earthy Mother Nature life, so the center of any related, with encounter and counter-array extraterrestrial form of life, plan must be the UN

this is not limit and not forbid the any country want to have its own plans, but the central planning and basis must be the UN, the planet Earth do not need emperors and in no one case fuhrers. There is, as and there was from 1947 the UN International Organization with equality of all the members] because politicians always drag at the tail okay very rarely do you have a politician who farsighted and see the future no they see the past and as a consequence they do not want to have the giggle factor [the giggle factor occur from those have unlawful and illegal interests to withhold information about the subject ...and to lying and slander and false to accusation first of all, the all subject as scientific fiction, but and what the Mother Nature was created the Earthy's "who" in order to face this fabricated giggle factor that really are not at all giggle factor (and are not and not is not, because in the central planning of facing extraterrestrial threats are and the real progress, the prosperity, and the open horizons in the universe and all that demand and a fabulous amount of Earthy's "who" units, many units of the humane variation "mighty humans")] thrown at them they do not want to have people roll their eyes every time a politician starts to talk about these ancient civilizations, basically they the c hide their rear.[]

-Interrogative intervention by the reporter: So, so what do you? one americas most eminent theoretical physicists say to people watching this who might be thinking You UFOs UAP's they are just a bit of a giggle seriously they do not need to be taken seriously.

[My own comments on the Interrogative intervention by the reporter: So, so what do you? one americas most eminent theoretical physicists say to people watching this who might be thinking You UFOs UAP's they are just a bit of a giggle seriously they do not need to be taken seriously.

[Is a very serious issue and if someone thinking really serious about the mater these sightings of Unidentified Flying Objects and U unidentified Aerial Phenomena could if we ignore that, they may even develop in the near future into an annihilating threat to the human species (the loss from the consciousness of humans of the existential constants for the human species is tantamount to the extinction of the species), apart from the fact that these views shown to have capabilities that could actually develop into an annihilating threat to all life on Earth]

-Continuing of the answer: If it turns out that we have in fact been visited by an advanced civilization this would be this let me take that, if it does turn out that

we have been visited and it could be proven by an advanced civilization then that would be the greatest moment in the history of the human race it would be a pivotal event in the history of homo sapiens on the planet Earth the realization that we are not alone and then of course we have to begin the process of analyzing the question who are these People? What do they want? How can we relate to these people? These are cosmic questions and so this is perhaps one of the greatest questions facing the history of the human race what happens if we make an encounter?

[My own comments on the continuation of the answer: If it turns out that we have in fact been visited by an advanced civilization [we the legal ones through me the Earthy's "who" have the capability of me reading the memories of many creatures of many environments] this would be this let me take that, if it does turn out that we have been visited [and I can participate and reinforce the researches for example in Nazca area I can read the subsoil for proofs of any kind of proofs if case of visiting then by extraterrestrial life, and this is only an example] and it could be proven by an advanced civilization [My opinion is that a real advanced civilization independently from how much they in any or in all the fields could be more advanced from us, or from to how much we could lack in advancement in any or in all the fields, they would pursue to communicate with us through their in person appearance in the highest level of international representation the UN and there and through in complex discussions (they since 1975 through the Earthy's "who" capabilities had as and they continue to have this ability) with the highest level of representative of UN with the General Secretary, and to made us known which is their come from place of the universe, what is their "who", their purposes of their voyages and expansion in the universe, their purposes of their visiting our planet, to asked from us and if we approved their purposes to made an alliance with them, to give them the permission to continue visiting our planet and if we wanted to give them a place as their base on Earth, to participated from our part with own similar purposes as equals with them in their purposes and in some degree to participated and in their voyages fir our own similar with their own purposes] then that would be the greatest moment in the history of the human race it would be a pivotal event in the history of homo sapiens on the planet Earth the realization that we are not alone [The greatest moment in the history of the human race is the same the creation of the human kind itself, and sure and before the historical years the humanity (of course there was and before the historical years, in its then extent and characteristics humanity) and from its beginning and through the thousands of years path the human race and before the historical years would have to demonstrate many great moments and the

overcoming and hyperkeratosis of enough of existential for the humankind obstacles and ongoing the path the human kind set and the existential for the human kind and for the Earthy in general life constants, and based on the primitive societies and cultures developed the first developed cultures and religion beliefs as and the base of and the laws for the protection of the humane ideals and values and through the years path and the evolutionary path and of the humane existential constants and overcoming many obstacles, but and through and hyperkeratosis of obstacles as for example was the existential for the humanity obstacle that constituted of the third nazi (germanic then) reich formation, we the legal ones of the humankind {since June 1974 in the humankind adding and me Dimitris Mantzanas the variation of "mighty human" the Earthy's "who" was created by entire Mother Nature's gene chain with main purpose of my creation and destination to counter-array against similar with me in mighty, extraterrestrial "who", and giving the chance and to consist the basic element for the progress, for the prosperity, for dreams in open horizons, and will stay only dreams? No in no one case no, we the legal ones (without stuck at all in the fact of my fifty years) was not mine decision to be alone, I wanted to have made children from many years ago} are found in a crucial point of the path and in front of an existential obstacle that consists of the fourth nazi, illegal, criminal, murderous, parasitic (echelon thus time) reich formation, and their very recently be discovered alliance even and with extraterrestrial forms of life and they together with them against the planet Earth and against the legal ones of us the Earthy's in general, an existential for the human kind (and for the Earth in general) obstacle (that consist of and obstacle to progress, to prosperity, to open horizons) that must from us the legal ones to overcoming and hyperkeratosis, and in continue and immediate to face (if they do not retreat) and the extraterrestrial threat and the legal ones to open our horizons

] and then of course we have to begin the process of analyzing the question who are these People? [first of all, they are not people, they are extraterrestrial biological creatures obviously the most advanced creatures of their own extraterrestrial (Mother Nature for them) gene chain, and among them seems to coming and the more advantage of them, their extraterrestrial "who" that cause under intelligent (with their brains) controlled the unidentified aerial phenomena that from the moment can tracked by radar, by infrared sensors, and by optically, means that in these aerial phenomena finding some kind of their advanced flying machines, that could be for example inside a warp bubble, that is, of them inside very advanced machines their extraterrestrial "who", who what kind of "who" they are, that coming from another planet and instead of going to in person appear in UN, they circulate over the nazi echelon basements and they hang out with the undergrounds illegals, nazis, criminals, Jasons, and echelons, obviously they seems to have disadvantage in counter-array in opposite and

against the Earthy's "who", but they to make company with the undergrounds
Jasons and echelons? What kind of "who" they are?]

What do they want? [They are coming from decades ago in Earth never
make known their appearance, never try to communicate, since 1975 and
onwards they have the opportunity and to come in complex discussions with the
Earth, but they preferred to stay hide behind the fourth's nazi formation echelon
machines and hide and in their flying machines, and to continue to coming in
Earth and to act on Earth unidentified uncontrolled and in secrecy they to serves
their own interests, are their interests lawful and on interests the Earth? In which
manner their interests to be lawful from the moment they exploit the illegal cover
that be providing to them, the nazi echelon machines in order they to serves their
interests (whatever their interests are) on Earth? they maybe to consider
us the Earth as part of their own back courtyard of their own sphere of influence,
I do not accept that neither for me nor for my provenance, I am not never in no
one nazi basement and in no one nazi echelon machine, and I will continue as
always to fight against all of them, as what Mother Nature was created me to be,
the Earthy's "who" and even and alone] How can we relate to these people?
[to make levels up in cosmic knowledge, levels up technologically, levels up
energetically, levels up in with equal for all the participants globalization (equal
in levels of participation of all the participants for example in the development of
technology), in globalization of represent UN (one of my own proposals to UN is
to formed a relevant committee for as many countries want to participate), in
globalization of defense (the advanced knowledge and the advanced defense
technology to be provided in all the participant countries), and always with base
in our cultures, in our humane ideals and values, and in our religion beliefs, in
the constants of our humane existence.] These are cosmic
questions and so this is perhaps one of the greatest questions facing the history
of the human race what happens if we make an encounter? [If we are
prepare spiritually and based on our humane ideals and values, on our cultures,
on our religion beliefs, then we can compensation our lack in advanced
technology, to give with our existence Earthy technology the existential for the
Mother Nature (for us the Earthy's in general) fight, to overcome the obstacles
and eventually we to come out victorious from this great challenge and gradually
making steady steps to reach and to category of type three civilization, and from
there and onwards the horizons expand in the universe and become limitless in
space and time]

-Interrogative intervention by the reporter: Have you copped criticism from your
professional colleagues to the way in which you are putting yourself out there
conceding the possibility that this might be extraterrestrial?

-Continuing of the answer: In the early days if you were a scientist and you begin to make statements about Public policy your friends would shake their heads and say oh there he goes again? that's passed because of the fact that so many times the People that have raised these criticisms were correct so many times the naysayers so many times the people that were skeptical turned out to be right and so times have changed there's been a sea change there's been a change in the way the scientific community looks at this, (supplementary question by the reporter: why do you think the pentagon Probably one of the most secretive organizations on the planet by necessity why do you think it is suddenly becoming more open and transparent about UFO's UAP's?), we're witnessing a sea change in the attitude of the military and the establishment they're now owning up to the fact that there are hundreds of hours of videotapes that our pilots have now stated that for days for days they would see these things flying around military installation not just one encounter but for days and hours they would see these things happening why is the military owning up to it? because the politicians are now beginning to say hey maybe there is something there that is a national security threat and why are these people the politicians beginning to say these things? because of pressure from below that is the average person is now beginning to say hey wait a minute maybe we should spend a little bit of our taxpayers money to investigate these things that Puts pressure on the politicians who then put pressure on the military is owning up to these things kicking and screaming they're owning up to these things because of course for them secrecy is the name of the game.

[My own comments on continuation of the answer: In the early days if you were a scientist and you begin to make statements about public policy your friends would shake their heads and say oh there he goes again? [] that's passed because of the fact that so many times the People that have raised these criticisms were correct so many times the naysayers so many times the people that were skeptical turned out to be right [] and so times have changed there's been a sea change there's been a change in the way the scientific community looks at this [], (supplementary question by the reporter: why do you think the pentagon Probably one of the most secretive organizations on the planet by necessity why do you think it is suddenly becoming more open and transparent about UFO's UAP's?) [], we're witnessing a sea change in the attitude of the military and the establishment they're now owning up to the fact that there are hundreds of hours of videotapes that our pilots have now stated that for days for days they would see these things flying around military installation not just one encounter but for days and hours they would see these things happening why is the military owning

up to it? [] because the politicians are now beginning to say hey maybe there is something there that is a national security threat and why are these people the politicians beginning to say these things? [] because of pressure from below that is the average person is now beginning to say hey wait a minute maybe we should spend a little bit of our taxpayers money to investigate these things that Puts pressure on the politicians who then put pressure on the military is owning up to these things kicking and screaming they're owning up to these things because of course for them secrecy is the name of the game. []

13th Question: I wasn't ready to understand, until I looked at the old documents going right back to the Robertson panel that started 1952 the year of the Washington flyover over Washington DC of a whole cluster of alleged UFOs I wasn't ready for the fact that the documents show very clearly there's been a deliberate policy of disinformation of stigmatizing ridiculing public discussion about UFOs for the last 50 60 years are you aware of that and do you think that explains a large part of the kickback that you get from talking about this subject?

Answer: The fact that there's been a lot of so-called debunking especially in the early days my attitude is of course , of course you're going to get debunking okay because we're talking about Cosmic questions that impinge upon national security, [one mine note: he refers to nsa (the usa's national security agency) which are in the nazi echelon machines basements], our role in the universe or understanding of who we are of course there's going to be a lot of debunking going on back then I would have been one of the debunkers too realizing that they are we ready for this information?

[My comments on the answer: The fact that there's been a lot of so-called debunking especially in the early days my attitude is of course , of course you're going to get debunking okay because we're talking about Cosmic questions that impinge upon national security, {one mine note: he refers to nsa (the usa's national security agency) which from many years ago are placed by the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation as operators of their illegal, criminal, nazi criminal ways parasitizing from me, their echelon machines in their, illegal, nazi criminally insane, harmful parasitic echelon machines basements}, [The cosmic events and cosmic questions never impinge upon national security of no one country or countries, we the humans and all our provenance and the entire planet Earth exist and live in a cosmic environment (the universe) and always there were and

always there will cosmic questions, and cosmic events that were and are always global events and from "who" emerge cosmic questions which always concern the entire planet Earth, and in order these events and the resulting questions to be analyzed, and to consider their reason of occurrence must these to be examined and to answered from independent and International entities, for the planet Earth from its establish in 1947 were and are always the UN organization. My creation and my birth (1974-1975) of course and it was a cosmic event with many cosmic questions resulting of this event (the natural powers and forces that I was created by Mother Nature to possess of course and have cosmic origine and provenance, and of course my creation and my subsequent birth was from then a cosmic event (a great for the human limits event) and the fact that me was created and born and as the first of my own genus, so and the progenitor of my own genus (and of course as and the only me in legal and natural power position and as leader of all my own genus-my own tribe) was even more great cosmic for the human limits event) and of course there was and the UN organization to serious and without illegal, nazi, criminal, harmful parasitic of no one of multinational bloc or state/states, political, military, economic, interest and gains to consider the event, and to be placed since then the whole issue in his right meaning, to had answered the cosmic questions, to had placed me (an infant me then, that is, minor) under auspice of UN, to have established from then an independent from states and peoples member place in UN assembly and councils for me, and of course the now in serve General Secretary of UN lived and then, he was young then, and of course, and at that time this whole issue also being concerned and him and that time and since that time, (and I had legitimate custodians my biological parents with whom and I was lived together, and whom grown up me until me to pass in my adult age). In order to occur this cosmic event my creation and my subsequent birth there was from then and the factor of needs for the creation event, that is, cosmic threats against the Earth, and cosmic threats can emerge from cosmic environment that were and are the outer space the universe, for example I refer an excerpt from the question - the old documents going right back to the Robertson panel that started 1952 the year of the Washington flyover over Washington DC of a whole cluster of alleged UFOs, the documents show very clearly there's been a deliberate policy of disinformation of stigmatizing ridiculing public discussion about UFOs for the last 50 60 years are you aware of that and do you think that explains a large part of the kickback that you get from talking about this subject? (and he gives a reference, on how the usa authorities and the parastatal create the factor of coverage and giggle about this subject) , as there were and many other (cosmic threats origin and provenanced from the outer space cosmic environment) threats against the Earth threats that were already been recognized years from before my creation and my birth, as potentially destructive threats for the Earth,

as asteroids and comets that were already been characterized as potentially hazardous space objects. And of course my creation by Mother Nature's entire gene chain and my, after normal for humans gestation time, birth had, and always continue to have, as main purpose and destination the defense and protection of all the mother nature and the entire planet earth from recognized pending and asymmetric threats that had emerged from the outer space and threatened (as and they continue to threat) the entire planet earth and all the Mother Nature, and obviously for these reasons the Mother Nature with all her power copied from the cosmic environment the universe and from the most powerful of the space bodies from the horizons of factors and created with biological way and adapted in an biological polysynthetic (with the contribution of all the species of Mother Nature's creatures) organic creature and to his living for his kind conditions the natural cosmic mighty powers and forces that she was created me to possess she, creating the humane variation of "mighty human" the Earthy's "who" that his "mighty human powers and forces" the my own "mighty human self" cover the entire planet Earth and extending and beyond the Earthy boundaries to the space, and the only Earth's organizational body that could ever to consider and to set under its auspice (from my birth until my adult age) the Earthy's "who" was always and always will be the UN organization (and that exists from 1947), and no one other multinational (political or military) organization or (political and military) bloc, and no one state or agreement of states and the cosmic questions that occurred from the cosmic elements of my creation and my cosmic existence, could never to impinge upon national security of no one country and no one agreement of states, and no one multinational (political and military) bloc nor multinational military either political organization never, and no one of the aforementioned entities whichever orientation and to had, never had and never have no one right neither even to the least to annoy no one element of my own indivisible human self nor of his inseparable from me, my always own indivisible mighty human self, and for no one reason. And although the 1974-1975 from the luck factor accidental appear to them the possibility {to them, to fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation}, the possibility for their own western political and military bloc (have they written reported which was their political narration before 1974-1975?), state and ukusa agreement of states {I was over beating them from the 1974-1975 yet, if they with their nazi narration could beat me, then would not have attacked me (an infant me then) immediate as soon as my energy reached to their echelon machines} the opportunistic (for limiting period of years, if the "liberation day" do not become reality and soon, in some years from now they will manage to fulfil their main purpose and eventually for them to annihilate all the human kind itself and themselves) chance that they, intercepting and

stealing, from me, and in continuation they illegal and nazi way keep under nazi occupation and this part to be their slave to behave they to this, to manipulating this, and sending this in such manner manipulated back to me so that, they to can perpetrating nazi crimes against me, an infant me then but as the first of my genus and progenitor and leader of all my own genus, so and against all of my own genus (and which nazi crimes since then and onwards were and are and will be, crimes and against billions other humans, and against all the Mother nature, and even and against the environment in which finding (the universe) the planet Earth), and perpetrating and more nazi crimes against me (and against my own genus, but and against billions other humans) to parasitizing from me (and from many countries and peoples, and from the whole Mother Nature), they on behalf of their unlawful, illegal, nazi, criminal, genocidal nazi murderous, parasitic their own personal and state, and of their own fourth nazi parasitic formation, political, military (defensive, offensive, and spying), and their economic interests and gains and as then and since then they continue onwards so, without no one break and they still continue so, they had since 1974-1975 (and they continue to have) intention and criminal premeditation to perpetrate all these crimes (they never gave the time to themselves to reconsider their attitudes and they to had "come out" from their basements of course facing and the punishment for all the crimes that they would have until then perpetrated, and of course facing and the punishment and for all the crimes (directly and indirectly) and for all the deaths that with any ways they were responsible and guilty until then, and they had the time from the 1974-1975 to think better the fact that the only way "come out" were being faced the rightful and legal punishment for all of the crimes that they would have perpetrated, as and the rightful and legal punishment and for all the crimes (directly and indirectly) and for all the deaths that with any ways they were responsible and guilty until then, only then they could to "come out" from their illegal, nazi criminally insane, genocidal nazi murderous, harmful parasitic their echelon machines basements (and they had time and over the years to have had reconsider their attitudes (and of course and the 2009 all of them together had time and could had reconsider their attitudes, but they all of them adopt their illegal, nazi criminal technical ways parasitizing from me, their echelon machines and the of their political, military, and economic, representatives their initial nazi, criminal, and genocidal nazi murderous, intentions and genocidal criminal premeditation against me and against my own genus, and all of them together the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation, and they all of them with all of their ranks and nazi numbers, all caged themselves together in their nazi echelon basements) and of course being faced the rightful and legal punishment for all the crimes that they would had/have (or will have) until then perpetrated (or perpetrate), and of course facing and the

punishment and for all the crimes (directly and indirectly) and for all the deaths that with any ways they were/are/will be responsible and guilty until then, they to had or to have or to will "come out" of their illegal, nazi criminally insane, murderous, genocidal nazi murderous, harmful parasitic, their echelon machines basements, but they and all of them were and are (and always will be) unrepentant nazi premeditating criminals, genocides', sworn enemies of my own, and of my own genus, sworn enemies of the Earthy's "who" and they were and are (and always will be) and sworn enemies of all the Mother Nature and of all the entire planet Earth, and I can reasonably to support that they are (and always will be) and informal allies of extraterrestrial invaders against the planet Earth}. And no one {of all them the fourth nazi, illegal, criminal, murderous parasitic (echelon this time) reich formation, and the whole nazi criminal parasitic echelon conspiracy}, had/have/will never any right and with no one way (of course neither with their illegal, nazi criminal, and nazi criminal technical ways parasitizing from me, their echelon machines), to exploit me nor any of my own biological descendants never, and no one had never any right to exploit (and from no one point on the planet Earth or from whatever other place of the universe, and of course neither from their illegal, nazi criminally insane, genocidal nazi murderous, harmful parasitic echelon machines basements), no one element of my own indivisible human self and his inseparable cosmic extension my own indivisible mighty human self, and no one right and with no way never they to under their nazi occupation and in state of slavery they to set, and always without my knowledge, without my permission, without my will, and without my consent, and without me to have no one manner to prevent or to stop them from that, they under their own nazi interests and in forced working from when I was minor (from my infant age) elements or total of my own human self and his inseparable cosmic extension and indivisible my own mighty human self, the Earthy's "who", but now they the forth nazi parasitic formation from they hate against me, and against my own genus (and from their hate and against the souls of my own babies whom they themselves by their own premeditation murdered), and from their hate against all the existential for the human existence constants, and from their hate against all the Mother Nature, and entire planet Earth. Now they reached in such nazi wretchedness that they even more have make (I do not know from some time ago) and an informal alliance with extraterrestrial forms of life ("who" coming from decades ago to Earth) and always they against all the Mother Nature and against the entire planet Earth.

I Dimitris Mantzanas am also invoke against all of them {against all the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation, and against the whole nazi criminal parasitic echelon conspiracy}, and the judicial precedent of the Nuremberg Trials (an autonomous and independent of states limitless "legal entity"), as and the 13th

Amendment written by Abraham Lincoln (as it adopt of the constitutions of enough countries (members of UN) having and an ecumenical application "liberating human ideals and values entity"), and on these entities (that was needed many (millions of humans) to die fighting in order to established) and on the "International entity" that is constitute from its establishment the UN, and who "International entity" I also invoke (the entire elements of UN, the statutory charter, all the international charters and conventions (as are, the charter for the child right, the international convention for the rights of persons that have characterized as having mental illnesses, and all the other charters and conventions) and all the UN representatives of all the UN sectors and of all the levels) have been based in the past, the legality, the humane ideals and values, the future, the progress and the prosperity, of humankind, and of entire planet Earth.

As well as me Dimitris Mantzanas am invoke and the valid constitutes of countries that were and are out of (the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon thus time) reich formation, and of the whole nazi criminal parasitic echelon conspiracy), so I am invoke and the strengths and forces of the law (of any level) and governmental (and all the political) representatives of these constitutes, as and of all the lawful participants (nationals of these constitutes). As well as and other "lawful entities", as foundations and organizations, fighters on behalf of human rights and on behalf individual freedoms and rights and political rights, and nations and tribes that were and are out of (the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation and out of the whole nazi criminal parasitic echelon conspiracy). As and the always existential for the human's constant the religion beliefs through their representatives. All they to support the entities that I am invoked and on who entities in the past (so and now, and if it would be needed and again in the future) had/as and now/ if it needs and in the future, have been based in the past, the legality, the humane ideals and values, the future, the progress and the prosperity, of the human kind, and of entire planet Earth. So that, from the all Earthy's we the lawful to make reality the "liberation day" for the Earthy's "who" for me Dimitris Mantzanas and for all the my own genus of "mighty humans", and that will be "liberation day" and for all the Mother Nature and the entire planet Earth. (will be "liberation day" and for all my own genus (and for those of my own genus whom, they the (fourth nazi, genocidal nazi murderous, parasitic formation), unborn murdered, and against whom they continue to perpetrate nazi crimes against their souls and against their bodies, as they have produced from their murdered bodies their nazi eugenic products, and will be "liberation day" and for my own sperm indivisible part of my own personality and of my own individual and collectively "mighty

human self", "who" part of my personality and of my own "mighty human self" they continue to keep under their illegal and nazi occupation, and they themselves in open view confessed that plan to use this part of my personality and of my own individual and collectively "mighty human self" against me and against all of my own genus, and against all of my own and of my own genus provenance. And they telling lies trying falsely to claim that is theirs and that they could ever to appropriate that part of my own personality and of my own individual and collectively "mighty human self" that they stole from me]] our role in the universe or understanding of who we are of course there's going to be a lot of debunking going on back then I would have been one of the debunkers too realizing that hey are we ready for this information? [For the Earthly's and from all, at least for us the lawful our role in the universe from the June 1974, acquired a new meaning with many senses, the basic meaning was from then on, that we had to face something come from cosmic environment (cosmic environment, the outer space with its extensions to infinity universe), and that because from my creation in June 1974 and the my subsequent birth ..I will report the continuation verbal to General Secretary of UN]

-Interrogative intervention by the reporter: Well are we ready let's assume this is , is extraterrestrial which even I noticed Ail Haynes the Director of national intelligence conceded (and the reporter refers to name of someone director of usa's national intelligence, who of course will find under cooperation with their main spying and surveillance weapon system their illegal, nazi parasitic echelon machines) was a possibility if this is ET? are we ready?
[me for them for the extraterrestrials am foreign for them, that is, me am for them extraterrestrial "who" and I am not ET at all, the opposite I have provenance and of all the Mother Nature's beasts ...I will report the continuation verbal to General Secretary]

-Continuation of the answer: I there's been a change in public attitude because hollywood has pretty much created the new mythology it used to be demons and gremlins and leprechauns that people dreamt about at night and feared now it is aliens from out of space and some of them could be friendly like ET and so I think the (one of my own notes: the extraterrestrials "who" as for them the Earthly "who" are not E T's) american public is ready for information about an encounter with an extraterrestrial civilization however I draw the line when it comes to advertising our existence to alien civilizations there's some physicists and scientists who say that we should beam into outer space messages saying here we are we are located in this quadrant of the milky galaxy you can visit us cuz you can triangulate our location this is the level of our technology come and get it I think that is fool hearty because look what happened to Montezuma when he met Cortez Montezuma made perhaps the biggest mistake in ancient history he

assumed that Cortez was a God in fact he was a blood thirsty pirate but what did Cortez have, he had steel the Aztecs had bronze weapons they were a Bronze Age civilization Cortez had the horse the Aztec had never seen a horse before Cortez had the written language the Aztec had a pictorial language Cortez had gunpowder the Aztec had bows and arrows and within just a few months the entire Aztec civilization crumbled, so I think it is a bad idea to advertise our existence to any alien civilization out of space until we know who they are what they want and how advanced they are.

[My comments on continuation of the answer: I there's been a change in public attitude because hollywood has pretty much created the new mythology it used to be demons and gremlins and leprechauns that people dreamt about at night and feared now it is aliens from out of space and some of them could be friendly like ET [The extraterrestrials "who" as for them the Earthly "who" are not ET's, "others" I will report the continuation verbal to General Secretary of UN] and so I think the american public is ready for information about an encounter with an extraterrestrial civilization [.....I do not want and they do not deserve to spend neither one moment of my time to about the usa and the rest if fourth nazi parasitic formation ...I have many to report verbal to General Secretary of UN.....] however I draw the line when it comes to advertising our existence to alien civilizations there's some physicists and scientists who say that we should beam into outer space messages [when soon, I think until the end of 2026 we the legal ones will be ready, a part (enough/many units) of the fabulous amount of Earthy's collectively "who" would have be born, I will make an request to UN we the indivisible always Earthy's "who" to send a message (we to beam into outer space, as more far as and better) to anyone in the universe "who" maybe to think that can counter-array against us the Earth's basic defense and protection forces, and that message we the collectively then Earthy's "who" to be illuminating for a short time, for a few minutes all the stratosphere around the Earth, sending the signal, from there and in, nothing can pass without molecular to be analyzed] saying here we are we are located in this quadrant of the milky galaxy you can visit us cuz you can triangulate our location this is the level of our technology come and get it I think that is fool hearty [For the extraterrestrials it was not needed, we ourselves to have been advertised our existence, they seems to be space explorers, and they discovered our planet Earth on by their own. They from decades ago have located in which quadrant of the Milky Galaxy we the Earthy's are, they even have located and exactly we are, our planet Earth, and much more from decades ago they are visiting (coming) in our planet Earth, but they are visiting (coming) as unidentified and under cover and for as long as they stay in our planet, they stay hidden in their obviously advanced

technologically flying machine, but and behind the underground fourth's illegal, nazi, criminal, genocidal nazi murderous, parasitic (echelon this time) reich's formation, the (and theirs of the extraterrestrials) illegal, nazi criminal technical ways parasitizing from me, their echelon machines (and hidden they behind these since 1974-1975). But the "liberation day" is the opposite of to be far away, is very close, and now as the situation are, soon we must, if they (the extraterrestrials) will not retreat (immediately after lose their coverage their echelon machines) to counter-array against them with whatever forces we the legal ones have, and we have and powers and forces, but our "natural cosmic mighty powers and forces", the always mine and indivisible from me the my own "mighty human self", but and always the Earthy's "who" that covers the entire planet Earth, are yet (as since 1974-1975) under the unlawful, illegal, nazi occupation of (and in state of slavery under of) the fourth nazi, illegal, criminal, genocidal murderous, parasitic (echelon this time) reich formation, and because they refuse their unconditional to UN surrender, we have to defined the day the "liberation day", and the defined day to be make reality the "liberation day", but before the definition of the day, I have to propose an a few days plan for before the final with weapon powers realization of "liberation day". The center of the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation the usa many times have claimed that they have buttons to press against the Mother Nature and against the entire planet Earth (they many times at least to me nazi criminal ways with their echelon machines have said that the moment which the UN with the legal destruction forces that have available does the move forced to destroy the echelon machines basements they the usa from their hate against me and against my own genus, and they hate against Mother Nature and entire planet Earth and their hate because they will lose their illegal, nazi, criminal, genocidal murderous, their accidental opportunity with their illegal, nazi criminal technical ways their echelon machines to parasitizing from me, and in further analysis from the entire planet Earth that from their hate against the existence and creation will press the murderous button that have make in their parasitizing from me, their echelon machines and with these their underground machines they will murder me and that they will press and their nuclear arsenal button and will destroy and the Earth, so because their intention pumping from their hate against me and against my genus I propose to give as much time will need to be found some or many women who will want to born mine children and after they artificial fertilized and have in their wombs my own children (and so the survival of my own genus "mighty humans" the Earthy's, "who" will be secured) the usa's buttons will have be deactivated and then the UN with the legal destructive weapons that can to have its disposal to completely destroy the echelon machines basements without to taking into account at all the possible tries of the usa to threaten my

own life, I do not account them at all, and at the end I do not no fear at all to die, and immediately after, we to face and the hidden many years now behind the echelon machines extraterrestrial informal allies of the usa's, and the "liberation day" to be defined chronologically immediately after certainty that enough women will be gestating mine children, me as the first and progenitor of my genus born the 1975 and as the only of my own genus the Earthy's "who" and as we are forced (by the fourth's nazi, illegal, criminal, murderous, parasitic (echelon this time) reich's formation, genocidal murderous nazi parasitic existence) me alone will counter-array against them (at least alone against of them "who" seems have the capabilities, similar with my own the Earthy's "who" capabilities, to cause the aerial phenomena that obviously wrapping the space-time) we will not give neither a moment time to the fourth nazi, illegal, criminal, murderous, parasitic (echelon this time) reich formation they to try lying and slander and false accusation to darken our future and if even and needs me as and many other of us to die enough women will born mine children (you the rests are billions and will make up your losses soon) and the future will not be darken, but progressive, prosperous, and with open horizons in the universe, with my own and for my own genus envision for the future and my own directions for my own genus about the realization of the purposes and destination of the creation of "mighty humans" genus the Earthy's "who" written recorded by me and storage in many personal libraries of the women who will born mine children, but by my own will and in the UN library, but first we must be ready, maybe and maybe and not, but maybe and to need give a big fight for our existence and for our free existence. From my own side I will deactivate of the extraterrestrial "who" their powers and will use my own powers against them deactivating and causing phenomena as their aerial phenomena and in order to make sooner the whole counter-array and I will try and I think that I will manage this to make (and me and by alone (and as and the only legitimate representative of my own genus) of my own genus the Earthy's "who") the stratosphere to became flammable from light sending them the message to not bother Earth, and after we will have hyperkeratosis all the existential for our Earthly existence obstacles, we will have the time to build our future], because look what happened to Montezuma when he met Cortez Montezuma made perhaps the biggest mistake in ancient history he assumed that Cortez was a God in fact he was a blood thirsty pirate but what did Cortez have, he had steel the Aztecs had bronze weapons they were a Bronze Age civilization Cortez had the horse the Aztec had never seen a horse before Cortez had the written language the Aztec had a pectoral language Cortez had gunpowder the Aztec had bows and arrows and within just a few months the entire Aztec civilization crumbled, [We the Earth maybe to be find now in front a such case as was the case Cortez – Montezuma, and we must not do the Montezuma's fault, we must learn from the history and to be in readiness for any

case occur, and as I have already mentioned maybe to be for us, from all the Earthy's at least for the lawful of us, to be need we to give an existential for the Earthy life fight, a fight that to note that the "liberation day" maybe from its definition time yet to be known to more than one foreign for the planet Earth, other planets the as "they" and the "C" call them the "the others" and maybe enough of these "others" be interesting in for that day, and one more motivate for them will be that the Earthy's "who" is more powerful and armed with forces from them extraterrestrial "who" and that day it will be the beginning for the expansion of the Earthy's in universe, so me the Earthy's "who" I am state that I am ready for that fight, I was ready from my creation yet. As already have mention they the "others" are not superiors from us, of course seems to have more advanced technology from the Earthy technology, but we the lawful can hunt them on the most of Earthy surface and within the range of our weapons (whatever kind of weapons we have) to fight them, and the "mighty human powers and forces" the Earthy's "who" that cover the entire planet Earth and exceed and beyond the Earth's boundaries in the space (so they cannot hide nowhere, neither in space, nor in the sea, nor on the land) seems to have advantage against them, so as many and to be that day (and the next of that day, days) the extraterrestrial "who" on planet Earth, the Earthy's "who" even and alone in one unit, as only one unit is, will manage to counter-array against them, and we can fight them and in the near space and from distant and on their informal allies on Earth the fourth's nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation terrestrial territory], so I think it (is a bad idea?) to advertise our existence to any alien civilization out of space until we know who they are what they want and how advanced they are. (We the Earth from 1974-1975 yet are stronger than them the fourth nazi formation for their own nazi interests and gains steal, limit and prevent the powers and forces of Earthy's "who")

[As I have already mentioned these obviously extraterrestrial unidentified flying and aerial objects and phenomena and biological creatures inside these circulate and from years ago circulated on Earth and they have study the Earthy life, and of course was from many years ago their priority and that continue to consist their priority continuous to study me (sure they the extraterrestrials knows from years ago and my first name) and sure they many times have polygonised the nazi, illegal, criminally, murderous, nazi criminal technical ways parasitic from me, the echelon machines basements, and sure they would know and the numbers and the names of the nazi scums which by their political superiors are placed as operators of the illegal, criminal, nazi criminal ways parasitizing from me, echelon machines the existential for the parasitic fourth nazi, formation their parasitizing technical midst's their echelon machines,

all the time years now the UAPs & UFOs sightings circulate over their heads and study them (and they (these extraterrestrial flying and aerial objects and phenomena seems to have in an extent and many of the capabilities that me and my own genus was created to have) would have study them and through my own brain, they (the extraterrestrials) would have magnetic-ray pictures from them) and the (and their factor of their coverage on Earth) illegal, nazi criminally insane, harmful parasitic through, their illegal, nazi criminal technical ways midst's their echelon machines parasitizing from me, the fourth's nazi, criminal, genocidal nazi murderous parasitic (echelon thus time) reich formation echelon machines basements.

But after the destruction of the nazi criminally insane, harmful parasitic echelon machines basements, will be freed powers and forces, "mighty human powers and forces" – the Earthy's "who" that from 1974-1975 yet, the Earth was in power to had nothing to fear from extraterrestrial civilizations, as much advanced may to were/are these civilizations, and the UN will emerge victorious from "liberation day", and as an potentially in power organization in the universe (potentially in power, because I am not me alone the UN, I am only an independent from state and peoples equal with the rest members, member of UN, and depend from what decisions the UN will take), with abilities to become maybe and the most powerful multinational/international organization in the universe (if the UN decide not I will make the expansion in the universe me and by alone with my women and my children, as many years me and to need for that)].....

14th Question: Back in the 1960s The Brookings institution did a paper that suggested that the world wasn't ready, america wasn't ready for the whole idea of the possibility of extraterrestrial life because of religious beliefs do you think that the notion of extraterrestrial life is incompatible with conventional religious idea?

[My comments on the answer (14th Question): Back in the 1960s The Brookings institution did a paper that suggested that the world wasn't ready, america wasn't ready for the whole idea of the possibility of extraterrestrial life because of religious beliefs do you think that the notion of extraterrestrial life is incompatible with conventional religious idea? [From the June 1974 Mother Nature judged that the human beings were ready to encounter and to counter-array and in fight extraterrestrial forms of life and she created her force and she intended since then him and so that through him (she must be created him so that him and to

feel close, and to love, and to make them happy, and to know and sexually what to do with any age of her forces of capabilities at least he was created and to can in stealth to watch the best ever of these procedures and to learn and to renewable his knowledge if it is needed) and her forces of capabilities {properly character women (they know by themselves if they have the properly character, and the very young of them knows by themselves) to born units of "mighty humans", units of the Earthy's "who"} to create her defensive and protective forces and in fabulous amount of "mighty humans" units her defensive and protective forces (and what are the usa's to dispute the Mother Nature's judged? Some underground without balls nazis, criminals, genocidal, liars, slanderers, and scrap papers were from before 1974 and continue to be the usa's and the rest of fourth nazi, illegal, nazi criminal technical ways echelon machines parasitic formation (they cannot, they never could, and they will never can to dispute Mother Nature), and nothing else and we the legal ones not going to allow them neither to deprive from us nor to darkness our future, our progress, and our prosperity, in a glory "liberation day" they must completely to hyperkeratosis ...I have supplementary to report verbal to General Secretary of UN the possibility of to exist extraterrestrial life and "who" extraterrestrial forms of life we the Earthy's and immediately after the "liberation day" possibly if not sure and if not immediately but soon after that day, of all Earthy's we the legal ones to encounter and to need and to face in battle them is not and never was foreign nor incompatible with the religion beliefs notion, And by the moment God is the existence and of course he is the existence, he is and the first of pioneers and the best of pioneers, and he is modern, for example his creation the universe in which we the humans and the Earthy life in general exist and live continues to evolute and to expand, so the notion of that exist and that we the humans have and always had the right to encounter extraterrestrial life is not incompatible with any religion belief (if we correct translate the religion beliefs they are not incompatible with the notion of extraterrestrial life) the God is God in the whole his infinity existence and his creation, and so the religion beliefs exceeds the Earthy boundaries (is and the only logical conclusion). The usa never was capable for encounter extraterrestrial life neither in relation with the whole idea nor with a small part of the whole idea, they as their last decades written history have completely depravedness from humane ideals and values, have no cultural level, they are enemies of God and Jesus. They are completely nazi scums, and without balls nazi criminals and unrepentant genocidal nazi murderous and they cannot even to exist without technical support from their illegal, nazi, criminal, genocidal nazi murderous, parasitizing from me, echelon machines that must together with them completely to be destroyed (I do not allow to no one neither even to pretend that I provide them technical life support) in order the rests to face the extraterrestrial threats, and to build our future]

Answer: In the year 1600 there was a farmer monk Geodon Bruno who was burned alive in the streets of Rome because he said they were aliens in outer space and if you go to Rome today you can go to the plain of flowers the very spot where he was burned alive and there's a statue of him a statue of him pointing to the heavens and it indicates that hey maybe civilization has grown up a bit that in 1600 we burn them we don't burn astronomers anymore we don't burn scientists anymore like they used to in the year 1600 so I think that the people are more accustomed to the idea that the universe is huge that our Earth is not the only planet out there that can sustain intelligent life and so I think the public would be more welcoming the idea that there could be other civilization out there.

[My comments on the answer: In the year 1600 there was a farmer monk Geodon Bruno who was burned alive in the streets of Rome because he said they were aliens in outer space [For many years now the same about behaviors from the side of the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation, is facing anyone (as and me, and I speak and personal for me) is referring in the existence of extraterrestrial life in other planets and for the need the Earthy's to counter-array, me the Earthy's "who" from my creation yet I am ready and always in readiness, of extraterrestrial forms of life "who" coming (not visiting, but coming) in Earth] and if you go to Rome today you can go to the plain of flowers the very spot where he was burned alive and there's a statue of him a statue of him pointing to the heavens and it indicates that hey maybe civilization has grown up a bit that in 1600 we burn them we don't burn astronomers anymore we don't burn scientists anymore like they used to in the year 1600 [They the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation, among the other billions of nazi crimes that they have perpetrated (and they continue to perpetrate). They by their own always premeditation and always being incited by their own nazi motivations, they murdered (unborn) in their gestation stage of their lives (that are serial homicides that constitute and genocide against my own genus "mighty humans") units of Earthy's "who" that since their creation by Mother Nature except the defensive and protective forces of planet Earth, are and the greatest astronomers, physicists, engineers, and in general and the greatest scientists] So, I think that the people are more accustomed to the idea that the universe is huge that our Earth is not the only planet out there that can sustain intelligent life and so I think the public would be more welcoming the idea that there could be other civilization out there. [Of course we the Earth finding inside the huge this creation that we call universe and we finding amidst

the infinity of stars and planets and my own opinion, as I have already mentioned is that the Earth is not the only planet that can sustain intelligent life, but the opposite I am sure that there are and many other live planets with living life in the universe and sure many of them are hosting and intelligent life, that is, advanced extraterrestrial civilizations. We the legal ones of the Earthly's must, and to create and the planet Earth's inter planetary Blue Helmet forces that will composed by "mighty humans" units - units of Earthly's "who" constituted in whole divisions and to accede levels up of categories of advanced civilizations, and to construct and the for various duties (for resting and short time living, for refueling, for technical support, and for attacking missions) the ESBOs for under supervision of UN the discovery of universe, and the expansion of the Earthly life and in other planets in other solar systems, since the June 1974 and the creation by Mother Nature of the Earthly's "who" we the legal ones of we, have and the ability not only to limit ourselves to are defending on the Earth amidst the infinitely of stars (and until when? Until we overcome by universe developments? And then what? We expect our complete destruction?), but we and to expand the Earthly life in the infinite of stars, and to ensure the existence of Earthly life in the eternity]

15th Question: Let's talk about what's the most plausible explanation for the apparent intelligently controlled technology that we're seeing this anomalous phenomena represent if it's not foreign adversaries if it's unlikely to be some kind of James bond or Dr No character that's concealed their incredible developments away from the rest of humanity isn't the most plausible explanation that this is some other intelligent life?

[My own comments on the (15th Question): Let's talk about what's the most plausible explanation for the apparent intelligently controlled technology that we're seeing this anomalous phenomena represent if it's not foreign adversaries if it's unlikely to be some kind of James bond or Dr No character that's concealed their incredible developments away from the rest of humanity isn't the most plausible explanation that this is some other intelligent life? [Is not only simply foreign (they are extraterrestrial) adversaries (and they are not simply adversaries are invaders), they are not characters from hollywood movies, {they decades now are concealed exploiting the fact, that exists yet, the fourth's nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich's formation, their illegal, criminal, nazi criminal technical ways parasitizing from me, their echelon machines (behind which hide since 1974-1975 and the fourth

nazi, criminal, genocidal nazi murderous, parasitic formation themselves) which and consist and existential and life technical support for their nazi parasitic existence, but I was never, I am never, and will never going to be, in no one of their nazi echelon machines basements and in no one of their nazi criminal technical ways parasitizing from me, echelon machines and in no one case, me will not going to become their technical life support for their nazi wretchedness, they must to be eliminated together with their echelon machines} they are real, and in the radius that extends these Aerial Phenomena can be (not necessarily but by the will of the one "who" causes it) and ultimate deadly, in the extend of their range they could to be, and to be absolutely characterized as and the ultimate lethal weapon that can with easiness to destruct even and nuclear shelters, they appear/seems like Aerial Phenomena because can moving in dimensions that is not made perceived by naked eye nor from a simple human brain and the common senses, sure is intelligent life but not part of the humanity, I do not cause me these Aerial Phenomena, I created with the capability and to can cause and to face and deactivate such Aerial Phenomena but never cause such phenomenon, and obviously it is about for extraterrestrial "who" forms of life]

Answer: Looking at all these videotapes okay I've come to two conclusions one conclusion is you have to be very careful some of these sightings are optical illusions so you have to eliminate them very carefully the other possibility is they are not ours that they represent a technology that is hundreds thousands of years more advanced than us and if they can go between stars it means they're up to maybe a million years more advanced than us, So the idea that some of them are caused by optical illusions that has to be looked at very seriously because an object that moves very slowly across your field division if you don't know how far it is you could think that it's very far away and zipping along like this when it's actually a piece of dust or an insect that just slowly flying across you field of vision.

[My comments on the answer: Looking at all these videotapes okay I've come to two conclusions one conclusion is you have to be very careful some of these sightings are optical illusions so you have to eliminate them very carefully the other possibility is they are not ours that they represent a technology that is hundreds thousands of years more advanced than us [I do not read somewhere someone to have eliminate/deactivate some of these optical illusions and if so in some case, the other possibility prevails, that is, that they represent a technology, obviously an extraterrestrial hundreds thousands of years more advanced than the Earthy technology, but as I have already mentioned only biological organic creatures that have a total biological (brain and body) advantages as for example extraterrestrial "who" can go so far ahead

the technology and they to advanced so much the technology, me the Earthy's "who" as it seems I was created by entire Earthy Mother Nature with more total biological (brain and body) advantages from the extraterrestrial "who", and after the realization of the "liberation day" and the elimination of stuck factor that are the fourth nazi, illegal, criminal, genocidal nazi murderous, parasitic (echelon this time) reich formation, me the Earthy's 'who', and I will make and many children and, as should have been done decades ago, in collaboration with the UN, and by common tries UN and me will advance the Earthy technology ahead of any corresponding extraterrestrial technology, and from Earthy's I am and the only "who" can counter-array and fight against with as seems they to have capabilities similar with my own capabilities against the extraterrestrial "who"] and if they can go between stars it means they're up to maybe a million years more advanced than us, [And as for one more time I described, soon and we from the Earthy's the legal ones will have and the advanced technology so that we to can between stars and in inter planetary expansion in the universe] So the idea that some of them are caused by optical illusions that has to be looked at very seriously because an object that moves very slowly across your field division if you don't know how far it is you could think that it's very far away and zipping along like this when it's actually a piece of dust or an insect that just slowly flying across you field of vision. [From what I can understand from the descriptions, they seems to moving by through and being detouring/being ripping the space time structure having anti-gravity and stealth characteristics, must be combination of both advanced technology with abilities to adapted on the total biological advantages creature capabilities obviously extraterrestrial "who", have anyone ever with whichever way to percept, to analyze, and to completely understand, and even more to deactivate one of these "optical illusions"? - Unidentified Aerial Phenomena?]

16th Question: And that's why I find I get sent hundreds thousands of videos from people who've held up their mobile phones and filmed some filmed something flying across the sky nine times out of 10 it's a waste of time because there's no reference point to make a judgment as to how far away that objects was the reference. Here though is that we now do have incontrovertible data from the u.s. navy, in particular.

[My comments on the (16th Question): And that's why I find I get sent hundreds thousands of videos from people who've held up their mobile phones and filmed some filmed something flying across the sky nine times out of 10 it's a waste of time because there's no reference point to make a judgment as to how far away

that objects was the difference. Here though is that we now do have incontrovertible data from the u.s. navy, in particular. []

Answer: There's a sad story that set the pace for the 1980s and 90s in 1986 there was a Japan Airlines flight going over Alaska three seasoned pilots the saw something they saw three objects tailing them and it was not just these three pilots visually tracking these things it was tracked by radar and they communicated with the ground controllers they were tracking this things what happened afterwards these pilots were demoted they were given desk jobs and their careers were pretty much over but you see we have a new gold standard emerging multiple sightings by multiple modes three season pilots visually locking onto an object tracking it with radar ground radars as well and they were just given desk jobs.

[My own comments on the answer: There's a sad story that set the pace for the 1980s and 90s in 1986 there was a Japan Airlines flight going over Alaska three seasoned pilots the saw something they saw three objects tailing them and it was not just these three pilots visually tracking these things it was tracked by radar and they communicated with the ground controllers they were tracking this things what happened afterwards these pilots were demoted they were given desk jobs and their careers were pretty much over but you see we have a new gold standard emerging multiple sightings by multiple modes three season pilots visually locking onto an object tracking it with radar ground radars as well and they were just given desk jobs. []

-Interrogative reference by the reporter: Now that Japanese Airlines story you are talking about is very important because there was also a cover up at this and in the united states there was a chap called John Callahan in the FAA Your Federal airports Administration Aviation Administration and he described how the CIA Your Central Intelligence Agency came in and ordered that it would take possession of all of the radar data all of the recordings the audio recordings of what transpired during that sighting between the air traffic controllers in Anchorage and the pilots in the aircraft why would the u.s. want to cover up this kind of interesting data? why not just be open?

[My own comments on the Interrogative reference by the reporter: Now that Japanese Airlines story you are talking about is very important because there was

also a cover up at this and in the united states [] there was a chap called John Callahan in the FAA Your Federal airports Administration Aviation Administration and he described how the CIA Your Central Intelligence Agency came in and ordered that it would take possession of all of the radar data all of the recordings the audio recordings of what transpired during that sighting between the air traffic controllers in Anchorage and the pilots in the aircraft why would the u.s. want to cover up this kind of interesting data? why not just be open? []

-Continuation of the answer: The question is why did the military cover up all these things and the answer is very clear it was the cold war because of the cold war the military did a lot of things that in hindsight seem kind of silly for example take a look at Roswell let's not get into the details of what happened at Roswell back in 1947 but why was there this massive coverup of the Roswell incident when it was maybe a weather balloon or who knows what it was it was because the united states military was conducting secret unauthorized experiments releasing radioactive materials into people's backyard now today that would be considered Ed outrageous we would be suing people left and right if looking at cancer rates going up but back then we did not know exactly how radiation spread in an environment because Hiroshima was only just two years before therefore the military authorized weather balloons to then release radioactive materials into people's backyard okay that's why the military had to hush up this whole Roswell things regardless of whether or not they were real aliens there because of the Cold war that's why there was so much secrecy (clarification question by the reporter: but the Cold war ended supposedly 30 years ago and yet we're still covering up why?), Well I don't know you have to ask the military about that one I mean the fact that the military had covered up these things for decades is clear because of the cold war we didn't know what the Russians had we were doing experiments on our site that were considered unethical because we thought the Russians were do it, there's something called MK ultra MK ultra was this incredibly large program to develop hypnotic materials drugs hypnosis psychics in order to win the war against Russia Crazy experiments that we would laugh at today but they were authorized and funded generously at america's top universities for decades and so the military definitely was in the business of covering up and authorizing incredibly stupid experiments.

[My own comments on the continuation of the answer: The question is why did the military cover up all these things and the answer is very clear it was the cold war because of the cold war the military did a lot of things [..... and all these billions of nazi crimes that they have perpetrated against me and against

my own, and in farther analysis against the entire planet Earth and against the environment in which finding (the universe) the planet Earth, do not seems me a kind of silly about them, but that must to be buried in their nazi echelon machines basements where they from 1974-1975 hide [] that in hindsight seem kind of silly for example take a look at Roswell let's not get into the details of what happened at Roswell back in 1947 but why was there this massive coverup of the Roswell incident when it was maybe a weather balloon or who knows what it was it was because the united states military was conducting secret unauthorized experiments [] releasing radioactive materials into people's backyard now today that would be considered Ed outrageous we would be suing people left and right [] if looking at cancer rates going up but back then we did not know exactly how radiation spread in an environment [] because Hiroshima was only just two years before therefore the military authorized weather balloons to then release radioactive materials into people's backyard okay that's why the military had to hush up this whole Roswell things regardless of whether or not they were real aliens there because of the Cold war that's why there was so much secrecy [] (clarification question by the reporter: but the Cold war ended supposedly 30 years ago and yet we're still covering up why?), Well I don't know you have to ask the military about that one I mean the fact that the military had covered up these things for decades is clear because of the cold war we didn't know what the Russians had we were doing experiments on our site that were considered unethical because we thought the Russians were do it [They were from their nazi echelon basements surveil lanced all the geographical area of the then Soviet Union, they knew that they were (and they continue to be and to continue to perpetrate unethical, unholy, hideous, nazi crimes), there's something called MK ultra MK ultra was this incredibly large program to develop hypnotic materials drugs hypnosis psychics in order to win the war against Russia Crazy experiments [They have exercise all these nazi criminally insane experiments against me and against my own genus, and I am not laugh at all with all that, and I am pursue all of them to be buried in their nazi echelon machines basement where they since 1974-1975 hide and from where they have perpetrated (and what they continue to perpetrate) all these (billions in numerous) nazi crimes against me and against my own genus] that we would laugh at today but they were authorized and funded generously at america's top universities for decades and so the military definitely was in the business of covering up and authorizing incredibly stupid experiments. [and their nazi echelon basements from many years ago have expand their nazi criminal, and their nazi murderous activity in their usa top universities and sure the usa military definitely was in continuously nazi criminal activity and in order

to covering up and these authorized by the usa governmental nazi numbers nazi criminally and murderous activity]

[About 16th Question and In all the blanks and dot blanks I have to verbal report entire reports verbal to General Secretary of UN]

17th Question: I asked you earlier about religion and the impact that you thought the revelations of potential alien life might have on establishment religion you've written a book yourself recently about God you're engaged with the possibility that the theoretical physics that you're exploring isn't incompatible with the idea of God now one of the people you've named Steven Hawking he suggested that God didn't fit in to the Big Bang Theory that there was no room for God why do You disagree?

[My own comments on the (17th Question): I asked you earlier about religion and the impact that you thought the revelations of potential alien life might have on establishment religion [the completely absence of religion beliefs, cultures, humane ideal and values from the establishment and operation (only against the aforementioned existential for our humane existence constants could have established and operate their echelon machines basements) of their echelon machines basements it turned out as big disadvantage of them which they have already be outwitted and be overwhelmed and from extraterrestrial forms of life and made with them and an informal alliance against their own home planet the Earth ...I have to report the continuation verbal to General Secretary of UN] you've written a book yourself recently about God you're engaged with the possibility that the theoretical physics that you're exploring isn't incompatible with the idea of God now one of the people you've named Steven Hawking he suggested that God didn't fit in to the Big Bang Theory that there was no room for God why do You disagree?

Answer: The late Stephen Hawking had very sharp opinions about God and the creation of the universe according to Einstein's general theory relativity the Big Bang was almost instantaneous and therefore Stephen Hawkins said aha there was not time for God to create the universe it just happened just like that and therefore before God could not possibly exist but you see that's an old Theory we do not necessarily believe that anymore because we now believe that the Big Bang was a quantum event and in a quantum event if it happens once it can happen again and again and again creating a multiverse of universes So instead of one universe expanding which is the Big Bang Theory we have a bubble bath a bubble bath of universes bubbles being formed out of the vacuum because we're now exceeding the Plunk energy and these bubbles Create entire universes and

so we begin to realize that there was plenty of time for a God to create a universe because there was not just one universe.

[My own comments on the answer: The late Stephen Hawking had very sharp opinions about God and the creation of the universe according to Einstein's general theory relativity the Big Bang was almost instantaneous and therefore Stephen Hawkins said aha there was not time for God to create the universe it just happened just like that and therefore before God could not possibly exist [As I have mentioned I have deep belief to God, but I refer in my Report/Proposals one of Stephen Hwakins theories, as probable in power theory to examine it, but I am not agree at all with the absence of belief to God from his consciousness, but this was his personal way, if he eventually have been found a place for him to rest somewhere I don't know and I could not know, the last judgment have always the God himself] but you see that's an old Theory we do not necessarily believe that anymore because we now believe that the Big Bang was a quantum event and in a quantum event if it happens once it can happen again and again and again creating a multiverse of universes So instead of one universe expanding which is the Big Bang Theory we have a bubble bath a bubble bath of universes bubbles being formed out of the vacuum because we're now exceeding the Plunk energy and these bubbles Create entire universes and so we begin to realize that there was plenty of time for a God to create a universe because there was not just one universe.

[For me it was impossible the God to had been surprised and to not had time to create the Big Bang and the universe which universe is continuing to be created, to evolution, and to expand, and for me the God created all this greatest of whatever else creation. Michio Kaku refers the Big Bang as an quantum event, and he is and one of the physicists that have formulated and the Theory of Strings according with which the basic space-time infrastructure have been formed/created, on the space-time strings that pre-existed of the basic infrastructure which have been shaped/created according with the Quantum Theory and the Quantum Engineering, and in accordance with my proposal, if we the legal ones manage to completely analyze, understand, and to correlate these and the rest theories that I mention, and in continuation to adapt our knowledge in practice our abilities in engineering will be not to create universes, that only the God can, but to be making wonderful structures on the basic space-time infrastructure that leading to very advanced technology and to make for us the poly-composed type three civilization....I have to add verbal to General Secretary of UN.....]

18th Question: Now I'll probably get my head put on a stake by some of the religions for suggesting this possibility but is it possible God's an alien? I mean is it possible that what we are some kind of genetic experiment by a much more advanced civilization? because at the heart of it isn't what say the Bible or the Quran describe something that involves a highly advanced intelligence coming down to planet Earth imbuing us with knowledge and skills passing on understanding isn't that God? Isn't that alien?

[My own comments on the (18th Question): Now I'll probably get my head put on a stake by some of the religions for suggesting this possibility but is its possible God's an alien? I mean is it possible that what we are is some kind of genetic experiment by a much more advanced civilization? [.....they had in their plans and to develop their nazi criminal murderous eugenic programs and to space and in relation with extraterrestrial forms of life...I must add verbal to the General Secretary of UN....] because at the heart of it isn't what say the Bible or the Quran describe something that involves a highly advanced intelligence coming down to planet Earth imbuing us with knowledge and skills passing on understanding isn't that God? Isn't that alien? []

Answer: Well if an advanced civilization were to come to the planet Earth in the year 1500 for example we would consider them to be God now does that mean that they are God? that created the entire universe? no it just means that our level of technology in the year 1500 would suppose that they are in fact God but whether or not there is a God? is independent of whether or not an advanced civilization were to meet us in the Year 1500 these are two independent questions one question is simply, are they advanced enough to appear like God? (a note by me: it would be big blasphemy for us the Earthly's, if in the case of our contact with a less advanced civilization we to pretend the Gods to them, and this would distort one (the most) of the basic constants of our existence in general, the our religion beliefs, and would consists deadly danger for our civilization and in overall for our existence eventually), the other question is are they God? that create the universe? these are two distinct questions.

[My own comments on the answer: Well, if an advanced civilization were to come to the planet Earth in the year 1500 for example, we would consider them to be God now does that mean that they are God? that created the entire universe? [the only until now for us the Earth recorded in videotapes and proven encounter and yet unidentified encounter with extraterrestrial forms of life, the nazi echelon machines basements prevent the recognizance of these

creatures and the communication with them, called them as the "others", and they trying to attribute to them a mystical and mythological superiority as existences, as them and to not be biological unknown yet to us extraterrestrial creatures and nothing elseI must to add verbal to the General Secretary of UN] no it just means that our level of technology in the year 1500 would suppose that they are in fact God but whether or not there is a God? is independent of whether or not an advanced civilization were to meet us in the Year 1500 these are two independent questions one question is simply, are they advanced enough to appear like God? [To me they themselves, as and their really advanced technology do not seems as to be something unreal or something with mythological dimensions and their really advanced technology it is not something that from the Earthy's at least we the lawful cannot have (and could have from decades ago) the fourth's nazi, illegal, criminal, murderous, parasitic (echelon this time) reich formation their illegal, nazi criminally insane, harmful parasitic echelon machines basements (which are and that they call them as "others" considering themselves as they to be "they"? and "they" and "others" continue to hiding from me and from us, behind their illegal, nazi criminal ways parasitizing from me, their underground echelon machines) ...I have verbal to report the continuation to the General Secretary of UN] (a note by me: it would be big blasphemy for us the Earthy's, if in the case of our contact with a less advanced civilization we to pretend the Gods to them, and this would distort one (the most) of the basic constants of our existence in general, our religion beliefs, and would consists deadly danger for our civilization and in overall for our existence eventually), the other question is are they God? that create the universe? these are two distinct questions.

19th Question: Now sir you like I am sure have seen the news media reports where key officials both former and serving have suggested that the united states government is in possession of quote exotic material the possibility is being openly discussed that the united states has recovered alien technology which was laughable a few years ago but you'd agree it's being openly discussed by people like Lou lazando, Christopher Melan, Eric Davis other people who've basically claimed to have inside knowledge what's your response to that? do you think that's a possibility? that somewhere in a dark cave somewhere there are us scientists working on recovered technology? [in a dark underground places somewhere there are from decades ago their illegal, nazi criminal ways parasitizing from me, their echelon machines (called their nazi echelon machines basements) Maby to not be look like caves but in there (and hidden from there) they try to being caged in their caves, our own future, our own dreams our own existence (yes our existence we are not Gods, but we are exist as

humans, we have humane existence, and of course some scientists (physicists and engineers) constructed their echelon machines, which obviously were and are as all of them completely nazis criminally insane (the scientific society, if they can called scientists have and from this kind unfortunately) and maybe they do not working on recovering alien technology, but sure with their actions keep from 1974-1975 under nazi occupation and in morph of slave the our Earthy Mother Nature defensive forces (and they by their own premeditation and murdered and maybe they to continue murder and more of the defensive forces of our Earthy Mother Nature) help the extraterrestrial forms of life to consist threat for the planet Earth]

[My own comments on the (19th Question): Now sir you like I am sure have seen the news media reports where key officials both former and serving have suggested that the united states government is in possession of quote exotic material [.....they have from 1974-1975 without me to to have read their thoughts and without to know yet their intentions they redirect (immediately just my energy accompanied always by my rest mighty powers, reached to their echelon machines and before developed in his intended extension and cover the from then their problematic brains, so and before me anticipate to read their thoughts) from his course and from that moment they and been detached from my own control a small part of my own mighty energy a small part of my own "mighty human self" my own but always Earthy's "who" and before my energy reached to their echelon machines have pass first of all through my Mother's and my Father's brain and obviously they had correct thoughts I did not take measures against them, and in continue pass and through thousands and millions human brains, but were all correct brains maybe not to be all perfect but sure were properly for humans and I did not take measures against no one of all them (and from the moment in gestation yet of my age I began to emit my energy until me to grown up in gestation always age enough so that, my energy to reach to the geographical area that they say usa maybe to had pass and one month), so I knew how the human brains were and If I have met an alien brain immediately would have taken measures to protect the Earthy's "who", but as I have already mentioned they steal part of my energy before my energy reached to their brains and read their nazi intentions and purposes (which then were in the operation of their echelon machines and because of the war then, the cold war were always in readiness and reacted instinctively without they to think first (so and without they to know the origin of the energy, without they to know the type of the energy, and without they to indicate their intentions and purposes) in the detection of my own mighty energy and steal and captured , and before they continue to falsely of course accuse me that I did not protect the Earthy's

"who" against them, first they to send to General Secretary of UN the what incrimination evidence they have from that crucial moment and for what of all their obviously false their accusations against me, and keep and maintain under their illegal, nazi criminally, and murderous occupation, and in morph of slavery the always mine my own "mighty human self" the always indivisible my own and always Earthy's "who", and I am not material nor exotic, I am human the variation "mighty human" and I am Earthy with provenance from all the Earth ...in all the unit I have verbal to add to the General Secretary of UN.....] the possibility is being openly discussed that the united states has recovered alien technology which was laughable a few years ago but you'd agree it's being openly discussed by people like Lou Lazando, Christopher Melan, Eric Davis other people who've basically claimed to have inside knowledge what's your response to that? do you think that's a possibility? that somewhere in a dark cave somewhere there are us scientists working on recovered technology? [in a dark underground places somewhere there are from decades ago their illegal, nazi criminal ways parasitizing from me, their echelon machines (called their nazi echelon machines basements) Maby to not be look like caves but in there (and hidden from there) they try to being caged in their caves, our own future, our own dreams our own existence (yes our existence we are not Gods ,but we are exist as humans, we have humane existence, and of course some scientists (physicists and engineers) constructed their echelon machines, which obviously were and are as all of them completely nazis criminally insane (the scientific society, if they can called scientists have and from this kind unfortunately) and maybe they do not working on recovering alien technology, but sure with their actions keep from 1974-1975 under nazi occupation and in morph of slave the our Earthy Mother Nature defensive forces (and they by their own premeditation and murdered and maybe they to continue murder and more of the defensive forces of our Earthy Mother Nature) help the extraterrestrial forms of life to consist threat for the planet Earth]

Answer: Well look at it this way I get a lot of emails from people that have claimed that, you're barking at the wrong tree the aliens are not there the aliens are here they visited us they are here and I say what proof do you have that the aliens are here and they tell me that they've been abducted they've been kidnapped by aliens in out of space well I have a word of advice if you have ever been kidnapped by an alien from outer space for God's sake steal something I don't care where there's a paperclip an ancient an alien pen an alien calculator steal something because afterwards you can say aha look, look, look, proof, proof (reference by the reporter: you want to see the evidence). I'm a physicist we live and die by the evidence maybe you saw an angel last night maybe you did

we'll have to like go through the evolutionary history of what it would take to create angel and so on and so forth but afterwards where's the data? where is the reproducible experiment that we can create tests on? its hear say after that so in other words we can speculate this afternoon until we're till we're blue in the face but all sorts of fantastic possibilities right and what have we gotten? nowhere we've gotten nowhere because there's nothing tangible (interventional reference by the reporter: but frankly if I was the u.s. government and I was in possession of technology like that I wouldn't be revealing it either, would you?). I think the probability that we have a captured flying saucer someplace at area 51 or whatever is very-very small but let's assume for the moment that it's true let's assume that we do have alien bodies, alien technologies and so on so forth would we keep it a secret? of course we're not stupid I mean you don't want to blab to the whole universe all the secrets that you can get from a damaged flying saucer but that doesn't prove anything either in other words maybe, maybe not science is based on things that are testable reproducible and falsifiable anything outside of that is disconsidered here Professor Kaku.

thank you very much.

[My own comments on the answer: Well look at it this way I get a lot of emails from people that have claimed that, you're barking at the wrong tree the aliens are not there the aliens are here they visited us they are here and I say what proof do you have that the aliens are here [I am not abducted nor kidnapped never in my life neither from aliens nor from Earthy's and they the nazi echelon basements could never manage and can never manage to abduct nor to kidnap me neither when I was an infant with no one way never. As far as it concerns, if we the Earth have visited by extraterrestrial forms of life to mention that, I was created by Mother Nature with the purpose and the main destination to face, to counter-array against and in opposite of extraterrestrial forms of life and in level of advantage "who"] and they tell me that they've been abducted they've been kidnapped by aliens in out of space well I have a word of advice if you have ever been kidnapped by an alien from outer space for God's sake steal something I don't care where there's a paperclip an ancient an alien pen an alien calculator steal something because afterwards you can say aha look, look, look, proof, proof (reference by the reporter: you want to see the evidence). To translate: I'm a physicist we live and die by the evidence maybe you saw an angel last night maybe you did we'll have to like go through the evolutionary history of what it would take to create angel and so on and so forth [I am not angel I have not either angel morph (I am not blond the opposite I have little hair), I am not enough tall nor thin (I am moderate in height and about 140 kilos), I am

not either fallen angel, (I have always deep belief to God, and I want to exist, and I am never doubt about the Almighty Existence the God Himself, I am not dispute neither the creation nor the power of the God, and likes me to exist in this God's creation we call universe and in all his infinity creation, I don't doubt and I don't dispute that he himself the God, at least gave his permission and his consent in order to created and to exists life on planet Earth, as and in other planets in the universe and in all his infinity creation (to add the note from the yellow paper about their satanic tactics against me)] but afterwards where's the data? where is the reproducible experiment that we can create tests on? [about the phrase "where is the reproducible experiment that we can create tests on?" they correlating this phrase with some of the aforementioned mentioning's of Michio Kaku about the existence of the angelic creations of God, and they said that they the forth nazi parasitic formation thinking and reinforced this their thinking the Greek orthodox church and with ecclesiastical papers that the mentioning meaning they to perpetrated the serial murders homicides of my own babies the genocide against me and against my own genus that they by their own premeditation have perpetrated against me and against my own genus and against all the Mother Nature and which genocide they continue to perpetrate In the end of the document, I am doing a reference about the meaning of the "Reproducible Experiments"] [I am Earthy, I have not at all alien/extraterrestrial origin (my natural cosmic mighty powers and forces have origin and provenance from the universe and from powerful space bodies, but I am human and Earthy), and all the blood tests and all the rests medical examinations that I have been needed to do and always regarding some humane illness that faced, have shown nothing different from that I am human and Earthy and the written results of these tests and examinations that I have done, do not writes nothing else from that I am human and Earthy, and nowhere writes that I am the humane variation "mighty human" the Earthy's "who", but writes that I am simple human and Earthy.] its hear say after that so in other words we can speculate this afternoon until we're till we're blue in the face [and never was and I am never blue neither to my face nor to my blood, and never had and never have blue-blooded nor royal lineage] but all sorts of fantastic possibilities right and what have we gotten? nowhere we've gotten nowhere because there's nothing tangible (interventional reference by the reporter: but frankly if I was the u.s. government and I was in possession of technology like that I wouldn't be revealing it either, would you?). I think the probability that we have a captured flying saucer someplace at are 51 or whatever is very-very small but let's assume for the moment that it's true let's assume that we do have alien bodies, alien technologies and so on so forth would we keep it a secret? of course we're not stupid I mean you don't want to blab to the whole universe all the secrets that you can get from a damaged flying saucer but that doesn't prove anything either

in other words maybe, maybe not science is based on things that are testable reproducible and falsifiable anything outside of that is dis considered here.

[And about all the document I have me and only me to supplementary verbal report to the General Secretary of UN]

[they murdered my own babies in order to do their nazi murderous eugenic programs and they have said and that they transplant organs of my babies to their own bodies, they ignored and laugh against me and my documents where I asked to return the stolen from me to me, after "liberation day" I will armed as the first, the progenitor, the leader, the only until now in life mighty human beast and I am real beast, campaign against their state territory and I will take by force back to my possession the stolen from me and my genus, (excerpt from the Question 13th: will be "liberation day" and for all my own genus (and for those of my own genus whom, they the (fourth nazi, genocidal nazi murderous, parasitic formation), unborn murdered, and against whom they continue to perpetrate nazi crimes against their souls and against their bodies, as they have produced from their murdered bodies their nazi eugenic products, and will be "liberation day" and for my own sperm indivisible part of my own personality and of my own individual and collectively "mighty human self", "who" part of my personality and of my own "mighty human self" they continue to keep under their illegal and nazi occupation, and they themselves in open view confessed that plan to use this part of my personality and of my own individual and collectively "mighty human self" against me and against all of my own genus, and against all of my own and of my own genus provenance. And they telling lies trying falsely to claim that is theirs and that they could ever to appropriate that part of my own personality and of my own individual and collectively "mighty human self" that they stole from me}] And to add that I want any can provide me the properly weapons as in the pictures seems for the purposes of my campaign, and must be something for real beasts for humane "mighty human beasts", I have the impression for something like primordial Samurai katana swords would be fit.

Professor Kaku.

thank you very much.

The attachment excerpts about the meaning of the Reproducible Experiment.

A reproducible experiment is one that other researchers can repeat independently, using the same methods, data, and code, to achieve the same or very similar results, validating the original findings and ensuring scientific integrity. It's a cornerstone of the scientific method, requiring transparent

documentation of procedures, full datasets, and analysis code to build trust and confirm results aren't unique to one lab or setup.

Key Aspects of Reproducibility:

Transparency: Detailed methods, data, and code are shared openly.

Validation: Allows others to verify findings, guarding against error or fraud.

Consistency: Results should be consistent across different labs, operators, or equipment under identical conditions.

Reproducibility vs. Related Concepts:

Repeatability: Same team, same conditions, same results (precision).

Reproducibility (Broad Sense): Different researchers, same methods, same results (validity).

Replicability (Stronger Form): Different researchers, different infrastructure, same findings (robustness).

Why It Matters:

Builds Trust: Confirms findings are robust, not artifacts.

Drives Progress: Allows new research to build on reliable foundations.

Upholds Integrity: Essential for identifying errors or fabricated data.

Reproducible Experiment

In subject area: Computer Science

Definition of topic AI

Reproducible experiments are defined as experiments that can be duplicated by other researchers independently, yielding consistent results. This capability is essential for validating research findings and is a fundamental aspect of the scientific method.

AI generated definition based on: Robotics and Autonomous Systems, 2018

1. Introduction to Reproducible Experiments in Computer Science

A reproducible experiment in Computer Science can be classified as either strongly or weakly reproducible. A strongly reproducible experiment is defined as a computational experiment that allows other researchers to confirm both

previously reported results and conclusions exactly. 1 In contrast, a weakly reproducible experiment is performance-rank-preserving, where the Spearman rank correlation between the original and reproduced results is equal to 1 and the Pearson correlation value is high enough to allow the confirmation of all previously reported conclusions, even if the reproduced results do not match exactly. The Oxford English Dictionary defines reproducibility as "the extent to which consistent results are obtained when repeatedly produced". 2 In scientific research, reproducibility is the ability to completely or almost completely duplicate an experiment or study by other researchers who are conducting the experiment independently.

-The Association for Computing Machinery (ACM) distinguishes between repeatability (same team, same setup), replicability (different team, same setup), and reproducibility (different team, different setup). 3 Reproducibility is critical for validating research findings, strengthening and verifying the credibility of results, and is considered the core of the scientific method. 2 In the context of Artificial Intelligence (AI), reproducibility enables verification of claims about a system's performance and properties, and is essential for technical auditing and accountability. 4 Challenges to reproducibility in Computer Science include restricted access to underlying data and code, expensive computational resources, and lack of traceable logs, which can prevent independent duplication of results. The creation of reporting standards and audit trails can improve the verifiability of claims and facilitate reproducible systems, particularly in the context of healthcare AI.

2. Essential Elements and Best Practices for Reproducible Experiments

Comprehensive documentation of algorithms, code, and experimental protocols is essential for reproducibility in computational research, as incomplete or imprecise documentation can be a significant barrier to replication, especially for researchers unfamiliar with specific tools or package managers. 5 Best practices recommend documenting not only the mechanics of code but also its design and purpose, including installation procedures, parameter descriptions, and design rationales, to facilitate understanding and reuse by others. For reproducibility, it is crucial that implementations are available and well documented. Reproducibility protocols may consist of strongly reproducible experiments based on the reuse of a collection of intermediate results, and weakly reproducible experiments for end-to-end experiments without pre-computed intermediate results. 1

-Precise specification of computational environments—including operating systems, libraries, hardware, and software versions—is necessary to ensure

consistent execution. Containerization technologies such as Docker provide a lightweight and configurable virtualization layer, allowing software with exact dependencies to run isolated from the underlying operating system and guaranteeing replicable execution regardless of conflicting dependencies or versions. 6 Dockerfiles and cached images further support reproducibility by enabling templating and rapid instantiation of containers. Universal package management tools like Conda facilitate dependency management by offering versioned requirements files and automated validation schemes.

-Best practices in experiment design include automation of performance measurement, consistent and unambiguous output formatting, and reduction of unnecessary variables that could affect performance or variance. Experiments should be designed to allow others to easily reproduce the problem and validate progress, which involves stripping out irrelevant code and dependencies and minimizing external variables such as disk and network input/output costs. 7 Clear labeling of metrics, always labeling units, and using a "verbose mode" for extra data are recommended to keep output clean, simple, and straightforward.

3. Tools, Technologies, and Methodologies Supporting Reproducibility

Containerization technologies such as Linux Containers (LXC) and Docker containers are used to create virtual networks that are scalable, efficient, and easier to manage than traditional physical testbeds, supporting the development and testing of complex network scenarios. These container-based emulation schemes reproduce the behavior of network components and instantiate fewer resources than virtual machine-based approaches. Mininet, a network emulator, leverages process-level virtualization and network namespaces to rapidly prototype large networks, facilitating the sharing and modification of topologies among experimenters. 8

-Workflow management systems, including Snakemake and Nextflow, provide native support for containers, capturing the execution environment and making pipelines more reproducible and easier to share and re-execute. These systems integrate tools, scripts, and commands seamlessly, and their modular workflow languages allow isolation and reuse of individual steps. Studies have shown effective reuse of Snakemake and Nextflow workflows, with evidence of code reuse and regular use of shared tools among pipelines. 9 Workflow description languages are commonly used to define atomic tasks and their execution order, representing workflows as directed graphs; some systems offer graphical user interfaces (e.g., Galaxy, Kepler) or scripting languages (e.g., Snakemake, Nextflow) for workflow specification. 10

-Reproducible experiments require the workflow description, the data, and the technical configuration of the experiment. The technical configuration is essential for performance comparisons and error detection, but the

reproduction of analysis should be independent of hardware and middleware configuration. 10 Computational reproducibility in scientific workflows is supported by data provenance management, export of workflow components for reuse, and documentation or modification of analysis phases through annotations. ---

-Strongly reproducible experiments allow exact confirmation of previously reported results and conclusions, while weakly reproducible experiments require a Spearman rank correlation of 1 and a high Pearson correlation between original and reproduced results, confirming conclusions even if results are not exactly reproduced. Docker containers are used to reproduce the entire process for generating and validating pre-processing pipelines. 1

-The FAIR (Findable, Accessible, Interoperable, Reusable) principles provide guidelines for data management and stewardship, aiming to maximize the value and usefulness of experimental data and protocols by making them digital objects that are findable and reusable by others. The combination of directed acyclic graphs (DAGs) with a Common Workflow Language in platforms such as Apache Airflow is an appealing alternative for introducing FAIR principles in high-throughput experimentation facilities. 11 Achieving FAIR research data begins with a data management plan that describes steps to facilitate FAIRness and preserve and reuse research data. Metadata plays a crucial role in finding, managing, and reusing data, and globally unique and persistent identifiers such as Digital Object Identifiers (DOIs) are necessary for data citation and access. 12

-Methodologies for managing reproducibility in distributed and high-performance computing environments must address challenges such as heterogeneity, scale, and instability. Geo-distributed analyses are particularly challenging due to differences in computing capacity, topologies, security, and privacy parameters across sites. Workflow systems support reproducibility through features such as provenance tracking, export of workflow components for reuse, and documentation of technical configurations. 10 -----

-Dedicated curated repositories such as nf-core promote workflow reuse, and the FAIR Guiding Principles provide guidelines to improve the Findability, Accessibility, Interoperability, and Reuse of digital assets. Applying FAIR principles to scientific workflows is particularly important as it includes defining metrics to assess the ability of a workflow to be reproduced or reused, thus providing key quality information to workflow (re)users. 9

4. Challenges, Limitations, and Cultural Factors

Achieving reproducibility in computer science experiments faces significant technical challenges, including heterogeneity of hardware and software and complexity in distributed or networked systems. Distributed environments increase difficulties for reproducible experiments due to the presence of many

components, heterogeneity, scale, and instability, with geo-distributed analyses further complicated by varying computing capacities, dynamic topologies, and differing security and privacy parameters across sites. 10 Hardware heterogeneity in high-performance computing environments, such as those used at CERN, introduces variations in performance, precision, and execution behavior, making it difficult to consistently reproduce results across different systems. Dynamic scheduling and diverse hardware architectures, including differences in clock speed, number of cores, memory bandwidth, BIOS configurations, and cache size, can lead to discrepancies in computation times and outcomes. 5

-Reproducibility is also affected by inconsistencies in software environments, workflows, and the degree of openness in science. Issues such as silent errors, pseudo-random number generators, optimization techniques, and parallel computing intricacies contribute to the loss of reproducibility in computational research. 5 The use of proprietary software and lack of open-source practices can further hinder reproducibility, as can intellectual property and licensing issues that prevent code sharing. Cultural and social factors, including reluctance or failure to share code and data, and insufficient documentation, are major barriers. Incomplete or imprecise documentation, especially regarding installation procedures and parameter descriptions, is a significant obstacle to replication, with many experiments using popular software rendered irreproducible due to these issues. Proper version control and comprehensive documentation are important for managing workflow changes and facilitating reproducibility. Funding agencies have implemented policies to promote reproducibility, such as NIH guidance and the European Union's Horizon 2020 measures. 10

5. Impact, Future Directions, and Community Initiatives

In networked system designs and evaluations, rigorous and sufficient experimentation is required to ensure that theories work within their contexts. In recent years, the importance of providing not only results of experimentation, but also of enabling reproducibility has increased. The Association for Computing Machinery (ACM), for example, defines three main levels of reproducibility: repeatability, replicability, and reproducibility. 3 In network research, Mininet is used in Reproducing Network Research teaching experiments at Stanford University because of its simplicity and reproducibility, supporting rapid prototyping of networked environments.

-In the domain of machine learning, reproducible-experiment frameworks such as AutoPrep have facilitated the automatic generation and assessment of pre-processing pipelines, allowing researchers to quantify and reduce classification error in supervised learning algorithms through extensible, self-contained

experiments and protocols. 1 These frameworks support both strongly reproducible experiments, which confirm previously reported results exactly, and weakly reproducible experiments, which preserve performance rankings and enable confirmation of conclusions even if results are not reproduced exactly. --

-Success stories in computational systems biology demonstrate the impact of reproducible-experiment practices, with tools like the Chaste library and the Cardiac Electrophysiology Web Lab enabling reproducible simulation and model reuse. 13 In bioinformatics, workflow management systems such as Snakemake and Nextflow have introduced technical advancements including native support for containers, which capture execution environments and make pipelines more easily reproducible and shareable. 9 These systems facilitate the integration and modularity of pipeline components, making workflows easier to understand and reuse.

-Tools for model management and deployment in federated learning systems, such as MLflow Model Registry, Weights & Biases Model Registry, and Amazon SageMaker, provide features for model versioning, provenance capture, and automated deployment across heterogeneous infrastructures, which are particularly useful for reproducibility purposes. 14 Reproducibility protocols implemented in Docker containers and tested across operating systems have been developed to allow for the reproduction of experiments and results in data science projects.1

Note: I had not time to read and to make comments about the attachments I will report verbal to the General Secretary of UN, who I think that is obliged to communicate with me and immediately to call me to UN.

Hypernova

Beginning

YouTube

Hypernova

Nice music and picture it reminds the creation of our solar system, from a similar cosmic cloud of stardust, was created and our sun, the star of our solar system, is not an hypernova star, but is our sun the source of our life, and in continue the planets were created around the sun, as well as and our planet Earth, and our entire solar system, and life (terrestrial life) appeared on planet Earth, the beginning of our Mother Nature, and through three and half billion years evolution path and facing many difficulties and disastrous events, she reached the creation of the human kind, an overall amazing evolutionary path (me and only being through all this, this alone strengthens my faith, in God and Jesus) Therefore, the powers through which Mother Nature herself occurred were never unknown to Mother Nature.

With the same evolution path of creation, of our sun, are created and the hypernova stars, which when reached to end of their lives turned to supernova explosions from where (through enough stages of momentary and enormous changes and transformations where enormous powers are exerted) occur the horizons of factors (the so called black holes) the most powerful of the space bodies (one enormous such as space body, with enormous powers is finding in the center of our galaxy), this space bodies the horizon of factors have been proven by scientific researchers and discoveries that emits energy the so called by the scientific society as Hawkins emission, which of course reach and to Earth, and reached and to Earth, from the beginning of the life on Earth, and from before of the beginning of life on Earth yet, and these energy emissions and the information's which these emissions contain, the Mother Nature with whole her powerful gene chain (and with the contribution of all her creatures species) copied and adapted to the life and living conditions and needs of biological terrestrial life and she created the "mighty human powers", me Dimitris

Mantzanas the first "mighty human" and as me the first and the progenitor of my own genus—my own tribe "mighty humans" (and me and through me and all my own genus—my own tribe created by Mother Nature to possess the fundamental physical laws and all the resulting physical laws, the fundamental physical laws are and the laws which are governing the creation of the universe, so how much mighty? So "mighty humans" my own genus—my own tribe, so that I can named as "interstellar beasts".

I am not God nor the Jesus, and I am nor Envoy of God, I am be created as all the natural creatures and all the humans through biological parents by Mother Nature, for good purposes and me (and as me and all my own genus - my own tribe) from my creation always against the nazis, as nazis are (and I am always from my creation yet against all of them) and the fourth nazi, illegal, criminal, murderous, parasitic (echelon this time) reich formation and the whole nazi, criminal, parasitic echelon conspiracy.

The space bodies as are the horizons of factors of which similar powers, by Mother Nature, me (and through me and all my own genus—my own tribe) created to possess, are not Gods nor Jesus, but are powerful (the most powerful) interstellar space bodies.

Youtube

Beginning

For me, the Dimitris Mantzanas my beginning is the June 1974, it is the month and year of my conception and the beginning of my creation, of my existence and of my life, and me as and the progenitor of my own genus – my own tribe, was and always will be and the beginning for all of my own genus – my own tribe, for all of my descendants [and for those who been, murdered from the 4th nazi, criminal, murderous, parasitic (echelon this time) reich formation]. The every human has his/her own beginning of his/her own purpose of creation and destination of his/her existence and life. For me, this is how the Mother Nature chose, me to be created and be born "mighty human" and the first of my genus, that is, as the progenitor of my own genus – of my own tribe, and knowing the last period from research that I did alone via the internet and more clearly about my provenance (all the Mother Nature's gene chain, all the planet Earth), and which are the mighty powers that I was created by Mother Nature to possess, I basically conclude that I was created by Mother Nature to face extraterrestrial threats, that are equally "mighty" with me (threats that must be recognized by Mother Nature before my creation), but certainly in a broad threat against the Earth, they will have to join forces, not only me and several others from my own genus – my own tribe, but also whatever other Earthy forces available will be exist, we will have to participate in the fight to confront it. But the mighty powers that I was

created by Mother Nature to possess and through me to Possess and all my descendants [and those who been murdered by the fourth nazi, criminal, murderous, parasitic (echelon this time) reich formation] all my own genus – my own tribe, can (and could from many years ago, since 1975, as I had biological parents with whom I was lived and who grown up me, and who were and until me reach my adult age and my legal custodians, and no one else) to be **useful** in many other matters, such as and for dealing of Earthy factors which threatening life on Earth, such as the global overheating, the climate changes, the air and environmental pollution, as well as and for dealing with destructive and causing many deaths geological and natural phenomena such as earthquakes, as well as for dealing of crime (a sector in which I have and many years of work experience), and one of my proposal to the UN will be to create a permanent and lasting committee in the UN, in which all countries that wish to participate would be represented and where we would plan (and adapt our planning to any new data that emerges) how we could generally to improve conditions on planet Earth, such as for example climatic and environmental conditions on a global level, as well as to cooperate in order to prevent and deal with catastrophic geological and natural phenomena, to determine our orientation and plan our actions in relation and interaction in our possible (if not certain) contact with extraterrestrial life forms, extraterrestrial civilizations, and regardless or whether we will have any contact with extraterrestrial civilizations, we to plan our expansion, of the Earthy's in the universe, to planets of other solar systems, something that is necessary for the **ensuring** and perpetuation of earthy life to millions and billions years and so on. With our expansion to planets and in other solar systems we will be able to deal more effectively with any threats will emerge, and because as we know, our sun, the star of our solar system, will at some point reach to the of its live, indeed after many years, but we must ensure that our future will continues even and after this inevitable event. Me Dimitris Mantzanas, and me as representative of myself, but also as the only legitimate representative of my own genus-my own tribe, can only have a position "independent of state and peoples" in this (but also and in any other committee and council) committee (as and since 1975 me should have an "independent from states and peoples" position in UN, since 1975 I have not yet no one representation of myself, nor of my always mine "my own wider mighty human self" my own and always indivisible and always Earthy "who" in UN), and as a representative of myself and of my own genus – my own tribe, I can after the "liberation day" to place under the auspices of UN my own mighty powers and the mighty powers of all my descendants, the mighty powers of all my own genus – my own tribe, and that depend from how much soon I will find one or some or many women to make children, and or from when will be available the completed artificial womb, I can place under the auspices of UN, tens and

hundreds of my own genus-my own tribe "mighty humans", my own but always Earthy "who".

In the left picture the one but in her position (with this envision for the future, and all the rest forces of capabilities to create the "mighty human" blue helmet interplanetary forces of UN. In the right photo me, not in person me, but in actually me in my teenage years when and I watched on TV the then pioneering TV series Star Trek and without then to know that I was created and always am "mighty human" the Earthy's "who", and that I have the capabilities dreamed (then dreamed, now do not dream, but plan and plan based on data and Report and Propose), now in my fifty, but I think that many of those in the left of this my own (metaphorically speaking my own) retroactive photo, picture want to born mine children

Youtube

Resurrection

A beautiful and inspiring picture, a young woman with clear soul to stare the open horizons in the universe and with a great envision of the future which inspire for the exploration and expansion of the Earthy's in the universe for knowledge and for habitation of the Earthy's and to other planets in other solar systems in the universe, the universe is limitless, so and the young woman's in the picture her envision for the future is limitless and timeless, is consist my own inspiration for my own (and for my own genus-my own tribe's) envision for the future.

For me, for the realization of my own (and of my own genus – my own tribe's) envision for the future, in the position of the young woman of this picture can finding women not only in their late teenage or in the start of their adult age, but and women in their later age, but in reproductive age (and for me and for all of my descendants, sure no matter the clothes which they wear or their body style), these women are the survival and the future of me and of my own genus – my own tribe and their envision for the future (similar with the envision for the future which I can read in this picture of this young woman) inspires and is realize my

own (and my own genus – my own tribe's) envision for the future, and I will try to inspire this great envision for the future to as many humans I will can.

– And the word Resurrection is not a ban word (as they from their nazi, criminally insane murderous parasitic echelon machines basements pretend that is), and except and beyond the Resurrection of Christ have and many other means, as for example the elevation of the human spirit and thought, the elevation of the human ideals and values, the insight to perceive and to want to explore the open horizons, and all these accompanied with a very nice music from the PPK.

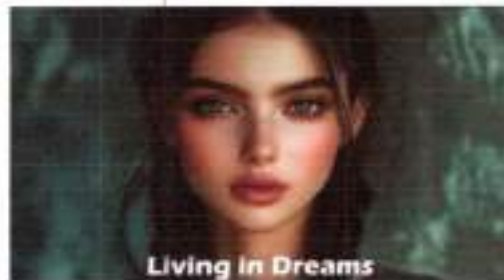

In the left photo one of in power force of capabilities to born, to create the enormous collectively Earthy's "who" to born the fabulous amount of "mighty human" units one of these humane beasts in pictorial representation and about in his twenty five years old in the right of her photo, picture and always ordered his life in her protection, and that is not only Fairy Tale (really can seem like fairy tale, but no this is real) and it is not only for an Autumn or for an Autumn is timeless. In the right picture one of these the "mighty human" beasts the Earthy's "who" in his about twenty five in an under UN supervision inter planetary mission the uniform could be about like this and me personal I will make and formal proposal to blue helmet leadership the uniform to be curated by the house of Armani.

Special report for the right picture, they from their nazi echelon machines basements said that from there help me the bob menendez, the trump, the trump junior, the trump bianca, the Hegseth, the cain, the rambo, the taison, the aforementioned nazi scums are and of the firsts of which, me must to break out

my hate and the fury of all my genus against them. They said that they all the usa people and all the greek people from their nazi echelon machines basements continuously perpetrating nazi crimes against me that they help me (at least they said that their intention is to make me to move against my provenance and against me myself and against my own genus) so that me to move against all the Mother Nature and against the entire planet Earth. Read carefully and the conclusions are yours to each one of you yours conclusions.

Longing

Living in Dreams

I have pumped these photos randomly from the you tube I do not know their nationality nor their personal status and wills, but giving the chance write and some comments, and that they in the photos are in power not verified but in power, forces of capabilities. And the real forces of capabilities of course and have longing for to create the "mighty human" beasts, the greatest beasts of all the Mother Nature's beasts ever, to make the protective and defensive and progressive and prosperous collectively and fabulous in amount of units enormous Earthy's "who".

Teneritas

And more in power forces of capabilities to born, to create more "mighty human" real beasts "who" always will protect and defend and the souls of those their brothers and sisters of whom, they the fourth nazi illegal criminal genocidal nazi murderous, parasitic (echelon this time) reich formation they always by their own premeditation and incited by their own nazi motivations (unborn) in their gestation stage of their lives murdered, and always the humane "mighty human" beasts will be take revenge (with fire, fury, and glory) against the genocidal nazi murderous fourth nazi parasitic formation, and without that to at all influence negative the dreams nor the living in real dreams nor the alive progress and prosperity living in real dreams.

In the left photo one in power force of capabilities it seems to wear some kind of traditional clothes of an ancient South American civilization, and on the right a photo from movie, but could depicts in her adult age one of the really beautiful and straight, and real humane beasts "mighty human women" greatest Mother Nature beasts ever, and I will live to see grand children from all my children, and the photo seems to depicts and ruins of an ancient temple of some South America civilization.

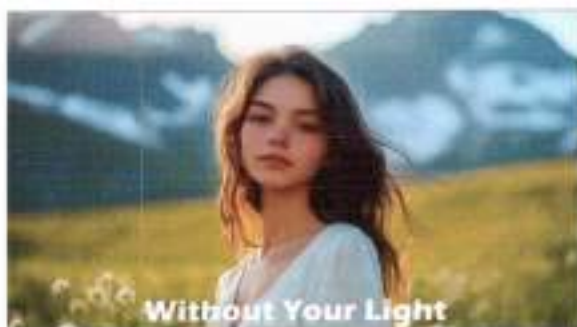

These two of the Africans (of course this is artistic illustration, but very close if not exactly with the reality) on the left of the photo one unit of Earthy's "who" beast and on the right a natural creature "who" lion beast (both they from their

creation know each other) in eye to eye and brain to brain interface and interaction

I am not divine, and I am not envoy of God, I am human of the variation "mighty human" and I have only biological substance, and this introduction of these two photos in order to say that quote the left photo because like me very much the creature on the left of the photo, and because many times I have seen from close in horse racings the creature on the right of the photo and am admiring their capabilities and I have provenance and from these (and of the right photo the left creature) creatures.

She have her own light the nazi basements tried to deprive from she her light and from many like she they unfortunately managed to deprive their light of many of each one of them, I hope not and from she, she can look on the right of her photo is what if she want from her womb can create, the humane beasts the ultimate warriors the "mighty human" warriors, they grown up under my own guidance and guidelines with limitless respect for her and their lives in ordered for her protection

Will be an epic expansion of the Earthy's in the universe and of course, as I have already mentioned I am and the only that from my creation yet have the capability, the legal right, and the required recognition by my own genus for to be under supervision of UN, in leader of the inter planetary Blue Helmet forces of mighty humans units of divisions, and after me, in the command of the "mighty human" divisions will pass and take over these duties the "mighty human-women" (and this could be written order by me to my all biological descendants written and in the statutory document of establishment of the inter planetary "mighty human" UN blue helmet forces) an indicative photo that I pump from the you tube about their external beauty, and about their behavior and their respect and loyalty to their progenitor.

And the of all the forces of capabilities their beauty and first of all their internal beauty of course and will give us our chances in the universe, and they must be many because we are in a cosmic and in of many views dangerous environment, we amidst the infinity of stars with many of pending and asymmetric annihilation threats against us, against the Earth, and we need many units of "mighty humans", we need thousands of the Earthy's "who" units and there are much place in the universe for them, as and for all, for simple humans for mighty humans and for the Earthy life in general.

Futured Earthy Advanced Technology ESBOs (Earthy Space Bolide Objects) in Hyperdrive massive Velocities. Of course, we the legal ones of the Earthy's after a clear win "liberation day" can achieve the goals. In the right picture one of the billion galaxies of the universe, we of the Earthy's the lawful must develop very advanced technology, more advanced than extraterrestrial civilizations, in order

we to be a force to be always reckoned with, and to stand of position of power opposite them.

They, from decades ago coming unidentified uncontrolled and constitute annihilated threat for the planet Earth, we must move quickly and the UN to inspire the right motivations and find many forces of capabilities and to give them the chances to many of them to born many my own biological children, many units of the enormous Earthy's "who", I expect the General Secretary of UN to call me soon.
